Welcome to the world of radio scanning. You can purchase an owners manual for your radio scanner from Grove Electronics, a well respected vendor of radio scanning equipment.

http://www.grove-ent.com/equipmentmanuals.html

To answer some of your questions.. most radio scanners have similar functions.

The search button should be used to initiate a search of the frequency range you specify using the lower and upper limits buttons. For example, to set the frequency range to search for frequencies between 160MHz and 161MHz you would enter 160 then press the LOWER button then enter 161 and press the UPPER button. After you do this you can press the SEARCH button and it will search the frequency range betwenn 160MHz and 161MHz.

To program a frequency you would press the PROGRAM button then the channel number you want to store the frequency in, enter the frequency ie 160.785 and press the E or ENTER button.

20. FW: Uniden Digital Scanner Release Dates

Yahoo group: freqofnature
Date: 2002-11-20 07:07:55 UTC
From: freqofnature
Topic: 20 Message: 20

Hello.
I just spoke with Scott Carpenter and got the skinny and all the fat
on the
new digital scanners.

250D
12/13/02 Uniden gets them
Give them a week to ship them to major dealers. It is a small
shipment of a
few thousand.
12/20/02 is about the time that most dealers will get them.
12/23/02 is when they will be shipped out to you from dealers..

785 D
12/20/02 Uniden gets small shipment out
Cards will also be made available with the fist shipment of portables.

Alex

22. Non-convict CDF Handcrews

Well, we can't say that all CDF Crews are Convicts
this summer.

The Butte Fire Center has received augmented funding
from the Governor to staff two paid, FF-1, Handcrews.

They are called Butte Crew 17-1 and Butte Crew 17-2.

So, if you see a CDF Crew that's not wearing Orange,
that's them.

27. PHOTOS: ICIS/Glendale Trunked System

Yahoo group: freqofnature
Date: 2003-08-15 19:07:23 UTC
From: freqofnature
Topic: 27 Message: 27

Photos from a recent tour of Glendale's new trunked radio system have been posted to the FON website. The tour included the Glendale Communications Shop, a mountain top transmitter site and the Verdugo Communications Center which is located at Station 21.

While driving through a canyon on the way to the mountain top transmitter site I had the opportunity to test out the new system. The audio was so clear that I had to ask if we were in analog or digital mode. I had plugged the Freq Of Nature website on the air but since we were in digital-encrypted mode the only one who heard it was the fellow on the other end of the radio. Before I receive a blizzard of whining e-mails, I was assured that most of the talk groups will not be encrypted and even the dispatch talk groups will, at least initially, remain in analog mode.

The FON Glendale and Verdugo Fire pages have also been updated with some cool images and information.

29. [Freq Of Nature] System will tie Montebello to other jurisdictions

Yahoo group: freqofnature
Date: 2003-08-29 04:49:16 UTC
From: Tracy Justus
Topic: 29 Message: 29

[Source: Whittier Daily News (http://www.whittierdailynews.com)]

By Michael Del Muro

MONTEBELLO -- The city took steps to improve emergency communications throughout the region Wednesday by entering into a joint powers agreement with nine other cities and agencies.

The agreement, which will form the Interagency Communications Interoperability System, or ICIS, is useful in helping agencies communicate during large-scale emergencies, officials said.

"This is a system that allows us to expand our area and talk to other agencies and jurisdictions through interconnections in the radio system,' said Battalion Chief Steve Huson of the Montebello Fire Department.

The Sept. 11, 2001, terrorist attacks were the impetus behind the communications joint authority, Huson said.

"Basically, on 9/11, not everyone could talk to each other,' Huson said. "With this, we can all be tied together and talk to each other.'

With the agreement, Montebello joins the cities of Glendale, Culver City, Burbank, Beverly Hills, El Segundo, Pomona, Pasadena and Torrance and the West End Communications Authority as members of ICIS.

31. [Freq Of Nature] Radio Shack Releases Pro-96 Digital Radio Scanner

Yahoo group: freqofnature
Date: 2003-09-01 23:52:35 UTC
From: Tracy Justus
Topic: 31 Message: 31

[Source: Radio Shack]

The good news is that Radio Shack has released their Pro-96 digital radio scanner well before the anticipated November date. The bad news is that they are already sold out. According to Radio Shack there will be more units available September 29th.

While these radio scanners aren't available at your local retail store they have been available by mail order by calling Radio Shack at 1-800-THE-SHACK (1-800-843-7422) ask for catalog number 20-526. The price of the unit is $499.99 plus tax and shipping charges.

For more information, including online owners manuals, check out Harry Marnell's Digital-Scanner page at http://users.snowcrest.net/marnells/digital-scanner.htm

Pro-96 Features
500 Channels ? 10 channel storage banks with 50 channels each.

V-Scanner Folders ? eleven 500 channel virtual scanner folders at your fingertips.

Phase 1 APCO-25 Digital Reception ? automatic detection and reception of digital voice modulation from conventional, trunked and mixed-mode networks.

Intelligent Adaptive Digital Tracking ? ensures optimal reception of digital signals from a variety of digital conventional and trunked radio system types.

Digital AGC ? automatically compensates for audio level variances in digital transmissions.

Simultaneous Multi-System Trunking Operation ? quickly tracks up to ten Motorola, APCO-25 or EDACS trunking systems at the same time. Mix conventional channels and trunking systems in the same channel storage banks. Scan conventional frequencies and trunked systems simultaneously. Automatically detects Motorola 3600 baud or APCO-25 9600 BPS control channel operation.

Automatic Channel Tracking ? automatically determines the trunking system frequencies for Motorola and APCO-25 trunking systems, using only the active system control channel.

CTCSS and DCS Subaudible Encoded Squelch Modes ? restricts conventional channel reception to transmissions using specified subaudible CTCSS tone or DCS data code when scanning or parked on a single channel. Code Search feature instantly displays the tone or code in use. Takes advantage of subaudible squelch tail elimination
turn off codes when they are present.

10 ID List Banks ? let you store 1500 IDs in 10 ID banks, each with 5 ID sub-banks. 30 IDs are available in each ID sub-bank. ID text tags let you easily identify the user of a particular talkgroup ID code.

Weather Priority Alert ? while scanning, automatically sounds an alarm tone to advise of hazardous weather conditions when it detects the alert signal on the local National Oceanic

and Atmospheric Administration (NOAA) weather channel during WX priority operation.

SAME/FIPS Weather Alert ? displays the weather event text for the specific cities or counties you choose so you can see and hear the reason for the alert.

Data Cloning ? lets you transfer the programmed data to another PRO-96 scanner. You can also upload or download the programmed data to or from a PC using an optional PC interface kit and application software.

12-Character, 4-Line, Alphanumeric Display ? shows you detailed operating information clearly.

Triple Conversion Superheterodyne Receiver ? virtually eliminates any interference from intermediate frequency (IF) images, so you hear only the frequency you select.

Preprogrammed Frequency Ranges ? lets you search for transmissions within preset frequency ranges or within ranges you set, to reduce search time and select interesting frequencies more quickly.

Hyperscan? and Hypersearch? ? the scanner scans at up to 60 channels per second and searches up to 75 frequencies per second, to help you quickly find transmissions.

Scan Delay ? delays scanning for about 2 seconds before moving to another channel in conventional mode, so you can hear more replies that are made on the same channel.

Adjustable Trunking Delay ? waits for reply activity on a trunking call for the amount of time you specify.

Priority Channel ? allows you to configure the scanner to check one channel every 2 seconds so you do not miss important transmissions.

Attenuator ? allows you to set, by channel or globally, a 20 dB attenuator to reduce receiver overload and interference from nearby strong signals.

Text Input ? lets you input a text label for each channel, talkgroup ID, channel storage bank, or other memory location so you can easily identify the transmission.

Lock Out Function ? lets you set your scanner to skip over specified channels or frequencies when scanning or searching, and skip over IDs when tracking trunked systems.

Key Lock ? lets you lock the scanner's keys to prevent accidentally changing the scanner's programming.

Battery Save Circuit ? When monitoring a single frequency, allows the receiver to sleep in between receiver activity.

Flexible Antenna with BNC Connector ? provides excellent reception and is designed to help prevent antenna breakage.

Memory Backup ? keeps the frequencies stored in memory for an extended time even without internal batteries.

Three Power Options ? let you power the scanner with internal batteries (non-rechargeable batteries or rechargeable batteries, not supplied). You can also use an AC adapter (not supplied) or power the scanner in a vehicle using a DC adapter (not supplied).

Supplied Trunking Guide ? provides a quick reference to public safety trunking radio systems in the United States.

Pro-96 can receive these frequencies:
25 ? 54 MHz
108 ? 136.9875 MHz
137 ? 174 MHz
216.0025 ? 225 MHz
406 ? 512 MHz
806 ? 823.9875 MHz
849 ? 868.9875 MHz
894 ? 960 MHz
1240 ? 1300 MHz

33. [Freq Of Nature] Ventura County Vegetation Management Controlled Burn Adams Canyon Area

Yahoo group: freqofnature
Date: 2003-09-03 06:00:56 UTC
From: Tracy Justus
Topic: 33 Message: 33

[Source: Ventura County Fire Department (http://fire.countyofventura.org)]

Camarillo - The Ventura County Fire Protection District (in cooperation with Ventura County Air Pollution Control District (APCD) and the California Department of Forestry) and with the support of the Farm Bureau, local residents, cattlemen and ranchers, is proceeding with a vegetation management/controlled burn of approximately 100 acres which is expected to provide both ecosystem benefits and protection against wildfires in this area. This burn is a part of a larger 1,255 acre project.

Vegetation Managment Controlled Burn
Adams Canyon Area
(Near Santa Paula)
September 3, 2003
8:00 a.m. - 12:00 p.m.

The Ventura County Fire Department works closely with APCD on all smoke management and health concerns, therefore, this project has been broken into five smaller units to reduce smoke in the area. This burning will only be done under optimal weather conditions and is subject to cancellation.

34. [Freq Of Nature] Minuteman III Launch Wednesday Morning

Yahoo group: freqofnature
Date: 2003-09-09 03:14:34 UTC
From: Tracy Justus
Topic: 34 Message: 34

[Source: Brian Webb, Rawhide Space Page II] (http://home.earthlink.net/~kd6nrp)

A Minuteman III missile is scheduled to launch from Vandenberg AFB early Wednesday morning shortly before dawn. It's expected to be a spectacular view that will be quite different from previous launches that occured near or after sunset.

During past missile launch events the WB6OBB repeaters in Santa Barbara have been used as a launch net giving up to the minute information on the condition of the launch including a count down. Because of the early morning hour it is unsure if this net will be active.

WB6OBB Launch Net Frequencies
147.0 PL 131.8
224.9 PL 131.8
449.3 PL 131.8

Vandenberg Radio Monitoring (http://www.freqofnature.com/frequencies/ca/santabarbara/vandenberg.html) by Freq Of Nature

VANDENBERG AIR FORCE BASE, Calif. - The 30th Space Wing, the 576th Flight Test Squadron and a task force from the 91st Space Wing, Minot AFB, N.D., are scheduled to launch an unarmed Minuteman III intercontinental ballistic missile Sept. 10 from North Vandenberg as part of Force Development Evaluation. The launch window is scheduled from 4:31 to 10:31 a.m. Pacific Daylight Time.

Capt. Rob Light, 576th FLTS, will direct launch activities. Mission Director for this launch is Lt. Col. Anthony Blaylock, 576th FLTS commander. Col. Wayne Louis, 30th Space Wing vice commander, will be the spacelift commander, or final go/no go for the launch.

The missile?s three unarmed re-entry vehicles are expected to travel approximately 4,200 miles in about 30 minutes, hitting a pre-determined target at the Kwajalein Missile Range in the western chain of the Marshall Islands.

35. [Freq Of Nature] Radio communication improvement urged

Yahoo group: freqofnature
Date: 2003-09-11 23:37:59 UTC
From: Tracy Justus
Topic: 35 Message: 35

[Source: Daily Review (http://www.dailyreviewonline.com)]

By Ivan Delventhal

HAYWARD -- When the urgent call came for emergency personnel to pull out of the doomed World Trade Center towers on Sept. 11, 2001, many firefighters apparently didn't receive the broadcast and died in the skyscrapers' collapse.
Today, two years later, Hayward City Councilman Olden Henson is continuing his push to improve the communications systems that public safety agencies use. His goal is to prevent a tragedy similar to the one that befell firefighters in lower Manhattan and to enable emergency workers to better coordinate responses to large-scale disasters.

A key concept, according to Henson, is interoperability -- the ability of all public safety workers, regardless of agency, to communicate instantaneously with one another via radio.

The unsettling reality is that many police, fire and medical agencies operate on isolated, stand-alone systems that do not allow them to communicate with other agencies, Henson said.

"This is a life-or-death issue," said Hen-son, who is a member of the National Task Force on Interoperability. "Our motto has been no man, woman or child should lose their life because of a public safety entity's inability to communicate.

"And that's certainly what happened in the World Trade Center and in Oklahoma City," he added.

Henson pledged this week that interope- rability would be a local priority for him during the next couple of years. He said that aside from working to improve Hayward's own system, he would meet with other Bay Area government officials to discuss the importance of shared communications capabilities.

Henson said the breadth of the interoperability gap first became apparent after the Oklahoma City bombing in 1995, when first responders used "runners" to carry messages from one command center to another because many federal and local agencies that responded to the scene didn't have compatible radio systems.

He said that many in the general public assume, incorrectly, that public safety personnel can pick up any radio and with the click of a button speak with any other emergency worker.

But that is far from the truth, mainly because radio communications systems are often not compatible with one another or operate on different frequencies.

For instance, while the Hayward Police Department operates on a relatively antiquated 400 megahertz radio system, many Alameda County agencies -- including San Leandro, Union City, Fremont and Newark police and the Sheriff's Office -- operate on a common 800 megahertz system. The Oakland Police Department also uses its own 800 megahertz system.

"If something were to happen in San Francisco, it would impact Hayward, it would impact Oakland, it would impact all of us," Henson said. "And it's not just terrorism, but natural

disasters.

"We sit on the Hayward fault so it behooves us to have the latest communications technology in place."

Donald Root, an assistant chief in the state Office of Emergency Services Telecommunications Section, said the events of Sept. 11, 2001, caused a "culture change" in the traditional autonomy of police and fire agencies.

"The cops and firefighters realized that they needed to start working together on some of these large-scale incidents," Root said.

He said that many jurisdictions in the state have made strides in recent years in making their radio systems more compatible with one another.

Henson is pushing the idea that local cash-strapped jurisdictions seek to secure homeland security funding to pay for upgrades to interoperable communications systems.

He said the short-term goal for Hayward is to upgrade its equipment and then possibly to contract with Alameda County for access to its 800 megahertz system.

36. [Freq Of Nature] Glendale City takes steps to join radio system

Yahoo group: freqofnature
Date: 2003-09-13 19:48:02 UTC
From: Tracy Justus
Topic: 36 Message: 36

[Source: Glendale News Press]

Glendale enters Joint Powers Agreement with eight other governmental units for radio system.

By Josh Kleinbaum

GLENDALE CITY HALL -- As the city of Glendale upgrades to a new citywide radio system, city officials are getting that system ready to serve as the hub of a region-wide radio web.

At its City Council meeting on Tuesday, Glendale agreed to enter into a Joint Powers Agreement with eight other government units. Montebello, Beverly Hill and Pomona have already agreed to enter into the agreement, and Burbank, Culver City, Pasadena, Torrance and the West End Communications Authority are expected to join.

"It's a way for cities to be able to communicate way beyond their existing systems, and mode from agency to agency," Glendale City Manager Jim Starbird said. "This system makes a seamless communication system by linking individual systems and utilizing computers using nine strategic locations."

The system, called the Interagency Communications Interoperability System, will be particularly useful for police who have to travel out of the city. The system, which could give seamless radio transmission from Las Vegas to San Diego, was the brainchild of Steve Hronek, the city's wireless communications administrator. Glendale will server as the hub for the entire region.

When Hronek began the process of upgrading Glendale's radio system to a more efficient one, he realized that for a little more money--between 2% and 5% of the total cost of the system itself--Glendale could link to other systems in a region-wide network that would operate similar to cell phone towers.

"Knowing police, being involved with them for many years and knowing how frustrating it is for officers from different cities to communicate, this was the logical solution," Hronek said. "From a year and a half to five years, we expect to see a steady number of cities getting on the system. Every time one of them connects in, our radio coverage increases that much."

Hronek started thinking about this system when he worked for the city of Beverly Hills more than five years ago.

"Let's face it, not all crime in Beverly Hills is committed by residents of Beverly Hills," he said. "But officers couldn't communicate when they were out of the city."

Now, Hronek is slowly transitioning the city?s radio services to the new system, purchased from Motorola for $17 million, which uses technology called trunking to use frequencies more efficiently.

A team of Motorola engineers is in Glendale, helping to de-bug the system. The police department's radio system will not be converted until Hronek and the engineers are confident that the system is flawless, he said.

The city has a six-year plan for the interagency system, which would slowly bring new systems into the network.

"In this post-Sept. 11 era, if there's a regional incident, how are you going to have communities communicate?" Starbird said. "This really is quite a break-through."

38. [Freq Of Nature] Los Angeles County to Link Radio Systems

Yahoo group: freqofnature
Date: 2003-09-13 20:25:40 UTC
From: Tracy Justus
Topic: 38 Message: 38

[Source: Los Angeles Times (http://www.latimes.com)]

By Patrick McGreevy

Los Angeles County leaders announced Friday they would spend $1.5 million in federal anti-terrorism funds to purchase equipment to improve radio communications among the area's multiple fire and police agencies during emergencies.

Problems arise because each public safety agency uses a different radio system and frequency to relay information to personnel in the field.

Los Angeles Police Chief William J. Bratton said officials plan to overcome that obstacle with the purchase of five vans equipped with computerized radio receivers that can patch together otherwise incompatible radio systems.

Communication problems have complicated responses to several major emergencies, including the 1994 Northridge earthquake and the 1992 Los Angeles riots, officials said. The same incompatibility of radio systems hindered emergency operations in the terror attacks on New York City on Sept. 11, 2001.

41. [Freq Of Nature] NEW! LAPD Radio Channel Plan

Yahoo group: freqofnature
Date: 2003-09-21 15:30:38 UTC
From: Tracy Justus
Topic: 41 Message: 41

[Source: Freq Of Nature (http://www.freqofnature.com)]

The Los Angeles Police Departments Valley Communications Dispatch Center is scheduled to open for business early Monday morning and in its wake will come some changes to the seemingly ever dynamic LAPD radio channel plan.

For quite some time the LAPD has been aggressively recruiting new dispatchers to fill positions in the new Metro and Valley Communications Dispatch Centers. With about 500 currently employed LAPD operators there are still about 200 vacancies left to fill. With more radio operators at the consoles the work load can be divided so that each division can have their own dispatch channels.

While the changes on Monday morning will be subtle to radio monitoring hobbyists, eventually they will become more evident as the thousands of radios in the field are reprogrammed with new instructions. The most noticeable changes will be hearing dispatches on some of the bureau tactical channels. The Transit Police frequency, which has already fallen silent after the LASO and private security companies have taken up that task, will be put into service as a citywide tactical channel.

Each bureau will retain two (2) tactical channels with the remaining channels going into use as dispatch channels for the divisions that shared common dispatch channels. During off-peak times these divisions will revert back to a common dispatch channel.

Metro Division will remain unchanged and contrary to rumor the old Tac 1 frequency of 154.83 MHz will remain in service to simulcast Air/K9 in analog mode.

(Hold for applause)

The Valley Communications Dispatch Center will eventually handle not only the Valley Bureau but also parts of the West Bureau (Most likely Pacific and West LA Divisions), dividing the work load between the two centers. In the event of one of the two centers being disabled the other center will be able to dispatch for the entire city.

[Source: AirCommSouthwest (http://groups.yahoo.com/group/AirCommSouthwest); LBReport.com (http://www.lbreport.com)]

After initially scaling back the plans of what might have been the greatest annual air show venue on the west coast, the Long Beach City Council canceled the event just days before it was to take place, October 3-5.

The events of ShoreFest were to take place at several venues around the city of Long Beach including a ship parade, music concerts, static airplane displays at the Long Beach Airport and an over the water air show with high profile performers including the US Navy Blue Angels and Canadian Snowbirds.

Other air show performances were to include...

US Air Force Wings of Blue
US Army Golden Knights
F-117 Stealth Fighter
B-2 Stealth Bomber
B1-B Lancer
F-14 Tomcat
Kirby Chambliss aerobatics (http://www.chamblissaerobatics.com)
Michael Goulian aerobatics (http://www.mikegoulian.com)
Greg Poe aerobatics (http://www.mmgboise.com/clients/gregpoe/)

43. LAPD Comms changes

Yahoo group: freqofnature
Date: 2003-09-25 05:12:21 UTC
From: Harry Marnell
Topic: 43 Message: 43

The Valley Communications Dispatch Center went online at 02:00 this past Tuesday morning. They are dispatching only Valley Bureau for the foreseeable future, no West Bureau divisions as had previously been suggested. Eventually each of the two centers will handle about half of the city, but it may be several years before the VCDC takes over West Bureau, which is the present plan.

Dispatch frequency changes (http://users.snowcrest.net/marnells/LAPDnew.htm) may not occur until sometime in October or November.

Harry

44. [Freq Of Nature] History Channel visits LAFD Fire Station 27

Yahoo group: freqofnature
Date: 2003-09-25 14:07:35 UTC
From: Tracy Justus
Topic: 44 Message: 44

[Source: Brian Humphrey, Los Angeles City Fire Department (http://www.lafd.org) Public Service Officer]

The History Channel's automotive-themed program "Shifting Gears" visits Los Angeles Fire Station #27 in Hollywood this Saturday, September 27th at 6:30pm ET/PT.

We hope you'll join us for the series second episode, as host Josh Hancock checks out a Los Angeles Fire Department Aerial Ladder Truck, Engine Company and Paramedic Rescue Ambulance, and explores how things have changed since our horsedrawn era.

The show will also have Josh driving a 2003 Ford Thunderbird while discussing the resurgence of retro cars; examining how the car wash got its start and looking into the growth of the auto detailing business. And finally, Josh will talk to his car and friends without lifting a finger using Blue Tooth Technology.

Again, the show is scheduled to air this coming Saturday, September 27th at 6:30pm ET/PT. Please check your local listing for the broadcast times of "Shifting Gears" in your area.

The History Channel is available on many cable and satellite television systems. For more information, please visit:

http://www.historychannel.com

..or contact your cable or satellite provider.

NOTE: The LAFD does *not* have copies of this privately produced television program to share with or sell to you. To purchase a copy, please visit:

http://store.aetv.com

45. [Freq Of Nature] PHOTOS: Los Angeles County Fire Communication Center

Yahoo group: freqofnature
Date: 2003-09-28 21:26:07 UTC
From: Tracy Justus
Topic: 45 Message: 45

[Source: Freq Of Nature (http://www.freqofnature.com)]

UPDATE: Photos of the Los Angeles County Fire Communications Center (http://www.freqofnature.com/photos/lacofdcomm/index.html) have been added to the website.

An impromptu tour of the new Los Angeles County Fire Communications Center was given to members of the Southern California Monitoring Association (SCMA) (http://www.socalscanner.org) this morning. The tour included a visit to the dispatch floor, a look at some of the legacy equipment used by the department in the past and a peak into the equipment vault where a steady stream of flickering LEDs keep things running smoothly.

One thing that impressed me was the earthquake resistance of the building. Instead of hidding the devices that make the building resistant to earthquakes, it was left open to view. What initially caught my attention was the fact that the entire building sits in a hole but doesn't touch the ground. The entire building is elevated on a bed a springs that are about 24" high. Everything that connects the building to the Earth must also have enough slack to move several feet during an earthquake. The entry ways to the building are like the ramps that lead to a dock; they can move as the Earth and building move relative to each other. The building's electrical ground was plainly visiable as a 2" steel cable leading from the building to the ground. Water pipes were also visiable and were designed to move with an earthquake.

Though the building looks like something out of the future, the computer screens are far from it since they are 15" monitors. Large television sets are strategicly placed around the room and turned on during weekend shifts and major incidents. The work environment looked pleasant enough with large windows looking out to the outside world and lots of smiling faces on the inside.

The museum peices include a telephone punch board with of all things an 8-track tape player sitting on top of it, several old radios, an old IBM 3278 console like one I used in college to write RPG II code (yuk!) and an old radio dispatchers license which was no longer required after 1970.

Hello Jose,

Simi Valley currently uses a mix of different systems for their various departments. Plans are underway to go with a trunked system, actually two trunked systems, with one dedicated to the police department and a second one for other city services.

The trunked radio systems will most likely be Motorola Type II systems but it's too early to know for sure because the bids for contract are still pending. I can tell you that both systems will be 800 MHz with the police department's radio frequencies already licensed and the city services frequencies pending licensing.

For the radio systems currently used by the city I think your Pro-95 will do just fine. The Police Department is on VHF and most all other departments are on UHF.

When you say "car to car" I assume you mean the Police Department. Simi Valley Police has three channels, two of which are repeaters and the third is simplex only.

160.785 MHz Channel 1 (Repeater)
153.875 MHz Channel 2 (Repeater)
155.985 MHz Channel 3 (Simplex)

There is also the option to talk direct on the repeater channels which is probably what you mean by "car to car". You should be able to hear units talking direct on these two channels as long as you're within about five miles or so from them.

In addition to these three channels each police radio is programmed with various other common mutual aid frequencies. You will find the typical Simi Valley Police radio channel plan at the following URL.

48. [Freq Of Nature] Manhattan Beach Police & Fire Decommissioning Event

Yahoo group: freqofnature
Date: 2003-10-03 16:59:00 UTC
From: Tracy Justus
Topic: 48 Message: 48

[Source: Clay Irving (Scanning Reference (http://www.panix.com/~clay/scanning))]

Tomorrow afternoon at 15:30, the Manhattan Beach Police and Fire Department buildings will be decommissioned -- The buildings are going to be demolished and new facilities will be built. The ceremony will include lowering the doors on the fire station for the last time, lowering the flag, a 21-gun salute, and final call on the Fire Department radio.

When: Saturday, October 4th at 3:30pm (During the Old Hometown Fair)
Where: In front of the old Police & Fire Stations - on 15th Street between Highland and Valley
See: http://www.ci.manhattan-beach.ca.us/admin/police_fire_facility_project/

The Police Department will be relocated from its headquarters on 15th Street to a temporary location at the Begg School site. The relocation is scheduled for September 26th and 27th but is subject to change.

The Fire Department has been relocated from its headquarters on 15th Street to a temporary location at the Joslyn Center on Valley Drive.

The Manhattan Beach Hometown Fair is also taking place in the same general area.

Manhattan Beach Radio Frequencies
37.0600 88.5 Bay Watch Hermosa (covers Manhattan Beach)

50. [Freq Of Nature] PHOTOS: Redondo Beach Public Safety Fair

Yahoo group: freqofnature
Date: 2003-10-06 04:36:42 UTC
From: Tracy Justus
Topic: 50 Message: 50

[Source: Freq Of Nature (http://www.freqofnature.com)]

UPDATE: Photos from the Redondo Beach Public Safety Fair and Police Department Open House (http://www.freqofnature.com/photos/redondobeach2003/index.html) have been posted to the Freq Of Nature website.

The Fire Department had their Truck 61 on display and gave a demonstration, raising the ladder. The Police Department had several displays including a booth where the public could handle the weapons and tools that the SWAT team uses. A slick top traffic car was on display as well as a motorcycle and a VIP (Volunteers In Patrol) vehicle. The police department was taking people on tours of their facilities including the front office, jail, dispatch and emergency operations communication center.

The police department facilities are quite small with narrow hallways and overcrowded rooms. The dispatch and emergency operations are located well underground. The journey down the flights of stairs was like entering the bowels of a dam. We were assured that the facility is earthquake proof even though we were underground...near the beach.

The event was quite fun and informative. We will be looking forward to next years event.

52. [Freq Of Nature] Food Fight! Grocery Clerks Go on Strike

Yahoo group: freqofnature
Date: 2003-10-12 09:51:35 UTC
From: Tracy Justus
Topic: 52 Message: 52

[Source: Associated Press; Mike in Anaheim]

LOS ANGELES (AP) - More than 70,000 grocery clerks at three supermarket chains in Southern California went on strike late Saturday after negotiations between union representatives and grocery store officials broke off.
Both sides failed to reach a compromise over several key issues, including proposed changes by the companies to the scope and cost of employees' health care coverage.

Clerks at Kroger Co.'s Ralphs, Safeway Inc.'s Vons and Albertsons grocery stores voted to reject the last contract offer and authorized a Saturday walkout, if an accord could not be reached.
More... (http://ap.tbo.com/ap/breaking/MGAEZC3OOLD.html)

There are reports from several radio monitoring associates of police being dispatched to incidents at picket lines as well as extra patrols of local grocery stores. There were at least two occurances of "food fights" at local Simi Valley grocery stores Saturday evening with typical halloween prank ammunition of eggs and pumpkins.

From: Tracy Justus
Topic: 55 Message: 55

[Source: Brian Herbert, SoCal MilCom (http://bassbinboy.junglescene.com/socal_milcom/)]

Edwards Air Force Base 2003 Open House and Air Show
Edwards Air Force Base Flight line
Saturday and Sunday, October 25th & 26th
Gates open at 7 a.m., flying starts at 9 a.m., closes at 4:30 p.m.
Admission is free

Edwards Air Force Base, California ? The 2003 Open House and Air Show at Edwards is scheduled for Oct. 25 and 26, 2003 with the gates opening at 7 a.m. and the flying tentatively set to begin at 9 a.m. and the event closing at 4:30 p.m. There is no admission or parking fee. The U.S. Air Force Thunderbirds (http://www.airforce.com/thunderbirds/), and several other aerial demonstrations are scheduled to appear at this event, which will celebrate 100 yeas of powered flight. This event showcases the aircraft systems and capabilities of the Air Force Flight Test Center, NASA Dryden Flight Research Center (http://www.edwards.af.mil/scripts/asp/goodbye.asp?url=http://www.dfrc.nasa.gov/), the Air Force Research Laboratory Propulsion Directorate (http://www.edwards.af.mil/scripts/asp/goodbye.asp?url=http://www.pr.afrl.af.mil/), Marine Aircraft Group 46 and other local and visiting units.

During the two-day event, visitors will see new and unique aircraft in the Air Force inventory, and some of the best aerial demonstration pilots and teams performing today. The various demonstrations are tentatively set to include Air Force aircraft such as the F/A-22 (http://www.globalsecurity.org/military/systems/aircraft/f-22-program.htm), F-117 (http://www.edwards.af.mil/brochure/docs_htm/aircraft/ac_html/f117nhwk.htm), F-16 (http://www.globalsecurity.org/military/systems/aircraft/f-16.htm), KC-135 (http://www.globalsecurity.org/military/systems/aircraft/kc-135.htm), C-17 (http://www.edwards.af.mil/brochure/docs_htm/aircraft/ac_html/c17.htm), B-1 (http://www.edwards.af.mil/brochure/docs_htm/aircraft/ac_html/b1blancr.htm), which will attempt to set up to 52 official world records, B-2 (http://www.globalsecurity.org/wmd/systems/b-2.htm), B-52 (http://www.globalsecurity.org/wmd/systems/b-52.htm), as well as NASA aircraft among others. This is also a once-a-year opportunity for taxpayers to see the kind of equipment they buy for the Air Force, and the abilities of the people who test, fly and maintain this equipment.

UPDATE - Photos from the Simi Valley CERT Class 2003-02 Disaster Simulation (http://www.freqofnature.com/photos/cert200302/) have been posted to the website.

On an unusually warm mid October Saturday the Simi Valley CERT (Community Emergency Response Team) class of 2003-02 met at the Ventura County Fire Department?s training facilities at Camarillo Airport to have their final day of instruction and to be put to the test by performing in a simulated disaster scenario. Tracy Justus took part in the simulation, playing the part of a confused victim in a school that caught fire after a major earthquake.

65. [Freq Of Nature] Where there is fire, there is TV hot air

Yahoo group: freqofnature
Date: 2003-10-31 03:51:58 UTC
From: Tracy Justus
Topic: 65 Message: 65

[Source: Ventura County Star (http://www.venturacountystar.com)]

By Colleen Cason
October 29, 2003

It was Monday morning -- Day 3 of the infernos of Ventura County -- so what were the Los Angeles TV anchors up to? Monday morning quarterbacking the personnel on the fire lines, that's what.

There they were -- hair lacquered in place and ensconced in the cool confines of the studio -- watching footage shot from a helicopter and wondering aloud if the firefighters on the ground in Simi Valley knew what they were doing.

There they sat, instantly analyzing these pros pitted against a force so relentless a helicopter can dump 2,000 gallons of water on it and somehow it shakes that off and roars back.

With expertise like theirs, it's certain these talking heads know all about the fire triangle. To thrive, a fire needs three things: oxygen, fuel and heat. Control any one and you weaken the blaze. I suspect one pontificating anchor could suck all the oxygen out of every fire in broadcast range of his station.

66. [Freq Of Nature] High school coaches worry that fans might be eavesdropping with scanners

Yahoo group: freqofnature
Date: 2003-10-31 06:20:56 UTC
From: Tracy Justus
Topic: 66 Message: 66

[Source: Associated Press; Bradenton Herald]

ATLANTA (AP) -? Many high school football coaches are concerned that when they use wireless radios to talk strategy during games, fans might be eavesdropping with scanners.

NASCAR encourages its fans to use the scanner devices to listen as such drivers as Jeff Gordon and Dale Earnhardt Jr. communicate with their pit crews during races. The scanners come complete with a list of frequencies for each racing team and have been used since the 1970s, when car owners began using two-way radios to talk with drivers.

Most high school coaches aren't happy about the possibility of a similar trend on Friday nights.

69. [Freq Of Nature] Simi Valley will seek $300,000 for fire expenses

Yahoo group: freqofnature
Date: 2003-11-02 02:06:03 UTC
From: Tracy Justus
Topic: 69 Message: 69

[Source: Ventura County Star (http://www.insidevc.com)]

By Roberta Freeman
November 1, 2003

Officials estimate city expenses related to the Simi Valley fire will total about $300,000, all of which they will submit for federal reimbursement.

The figure, released Friday, drew an audible sigh of relief from City Hall, which racked up a $15.2 million bill for damage and expenses after the 1994 Northridge earthquake.

The amount includes overtime for police and other city workers, food, supplies such as face masks and other emergency needs. Unlike the earthquake, the fire caused no damage to city buildings, roads and water and sewer systems.

"By and large this was a limited emergency," said Randy White, the city's emergency services coordinator.

White believes the city's extensive advanced planning paid off this week.

"From my perspective, the big picture was accomplished," he said. "At times communication could be better, but overall we did well."

As flames advanced quickly toward Simi Valley on the afternoon of Oct. 25, the city set up an emergency command center in a large room at the police department. In a matter of hours, all city departments mobilized into action for their assigned tasks, White said.

...

White said he was particularly proud of the job done by trained citizen community emergency response teams. They were dispatched to affected neighborhoods to relay information to residents about evacuation procedures.

Some residents complained that emergency information was not broadcast fast enough on the city's AM radio station, 530, White said, noting that any delays were because officials wanted to verify all the information first.

"The worst thing you could do is put bad information out," White said.

Date: 2003-11-03 15:22:37 UTC
From: Tracy Justus
Topic: 70 Message: 70

[Source: Harry Marnell; KCBS; Associated Press]

WEAVERVILLE, Calif. (AP) A California Highway Patrol officer was killed Sunday in a shooting in the agency's office here, although no other details were immediately available.

CHP Sgt. Bill East said the shooting occurred in the Trinity River office in this small town about 200 miles north of San Francisco.

East said he could not release other information about the shooting.

Officials at the Trinity County Sheriff's Department said no information was immediately available.

UPDATE: A couple of short audio clips from nearly 39 hours of audio recordings of the Simi Valley Fire have been posted to the website. The first recording is of a conversation between two Ventura County helicopter pilots and their assessment of the blaze and battle plan on how to attack it. The second recording is a few days later, just when things started to look good. This is a recording Monday morning of fire fighters on the east end of town performing structure protection and their conversation as they watch the first sign of the fire awaken with new found energy.

Clip #1 (http://www.freqofnature.com/sounds/svfire251715.mp3)

[Source: Ventura County Fire Department (http://fire.countyofventura.org); Ronald Reagan Library (http://www.reaganfoundation.org)]

Sunday, November 23, 2003,10:00 AM- 5:00 PM

To pay tribute to the firefighters across Southern California, the Ronald Reagan Presidential Library and Museum (http://www.reaganfoundation.org), in conjunction with the Ventura County Fire Department (http://fire.countyofventura.org), will hold Firefighter Appreciation Day on Sunday, November 23rd.

? Sign the ?Thank You Wall? ? pieces of which will be given to the Ventura County Fire Department, the Los Angeles County Fire Department, the Los Angeles City Fire Department, the California Department of Forestry, and the Novato Fire Department;

? Donate to the Steve Rucker Memorial Fund (the Novato Firefighter who died on October 29th while battling the Cedar Fire in San Diego) ? 100% of the proceeds from every purchase of the ?Freedom Above All? Franklin Mint Eagle Porcelain Sculpture in the Library Museum Store on Saturday, November 22nd and Sunday, November 23rd will be donated;

? Meet hundreds of firefighters;

? Learn about fire safety in the ?Fire Safety House?;

? View Hook and Ladder Fire Engines, a Ventura County Sheriff?s Air Unit Helicopter; and other apparatus;

? And have the opportunity to thank the men and women who risked their lives to save Southern California from the recent wildfires.

All outside activities are free to the public. Regular admission rates apply to enter the museum. Fighterfighters and their families will receive free admission to the museum all day.

Training, time commitments behind decline

By Charles Levin

Brent Coffey has hosed down brush fires, rescued injured victims from car wrecks and ventured into flaming buildings on the verge of collapse.

As a reserve firefighter, the 50-year-old Oak View carpenter has put himself in harm's way in the noble tradition of community service. Today, however, Coffey is among the last of his breed in the Ventura County Fire Department.

In the mid-1980s, the department had about 250 reserve firefighters. Now it has six.

Increased training requirements, union pressures and people's growing lack of time to make such a big commitment have thinned the reservist ranks over the past two decades, some officials say.

"They're becoming a thing of the past," said Jack Carreno, a 54-year-old Fillmore resident and county reserve firefighter for 29 years.

People, agencies, businesses receive recognition for efforts

By Roberta Freeman
The Simi Valley City Council honored about 75 people, agencies and businesses who worked closely with the city's emergency operations center, providing everything from muscle to supplies or a shoulder to cry on during the recent Simi Valley fire.

Along with special recognition for first responders such as firefighters, law enforcement and the American Red Cross, the city issued certificates of appreciation signed by Mayor Bill Davis to a range of agencies from the local park and school districts to local businesses and a very long list of citizen volunteers.

"Volunteerism is the name of the city, it really is," Davis said. "You see in a crisis this city comes together as one."

As Simi Valley heaves a collective sigh of relief for relatively little structural damage from the raging flames, the story of a highly organized effort behind the scenes during the crisis is beginning to emerge. The orderly evacuation of people and animals, timely road closures and coordinated efforts among public agencies and local volunteers strike a strong argument in favor of the city's full-time year-round commitment to emergency preparedness.

"There is an expectation from the City Council that we will be more organized because we do have a dedicated effort," said Randy White, the city's director of emergency services.

White and others in the department work all year to recruit and train citizens to serve as Community Emergency Response Team members.

Another group of citizen volunteers recognized Monday were the Amateur Radio Emergency Services Volunteers.

76. Motorola I-call question

Yahoo group: freqofnature
Date: 2003-11-20 17:27:07 UTC
From: Alain C. Bonnemaison
Topic: 76 Message: 76

Hello!

I have taken the habit of logging and programming any TGID that
I "find" during my listening.

I have recently programmed Southern California Edison trunked freqs
in my scanner with the I-call option turned on.

I can listen in on the calls by pushing SRCH on my 250 whenever I see
an I-call nbr flash on my display but I wonder if it is worth
programming them (pushing 'E')?

It seems that Motorola I-call numbers constantly change? Am I wrong?

Feel free to correct me and teach me.

Thanks kindly,

Al.

81. [Freq Of Nature] Vandenberg AFB Launches Top-Secret Reconnaissance "payload"

Date: 2003-12-02 12:31:34 UTC
From: Tracy Justus
Topic: 81 Message: 81

[Source: Freq Of Nature (http://www.freqofnature.com)]

As I gazed into the warm Southern California December sky a solitary shooting star traced a line to the target of my attention this morning. Five minutes and counting, a brighter shooting star would rise from the Earth like a Phoenix as if to answer the call of this insignificant speck of alien dust.

With Swiss like accuracy, at around 2AM, the folks at Vandenberg Air Force base released a token of human engineering into space for a long free fall back to Earth. The payload was a top-secret reconnaissance satellite, which was hurled into space aboard an Atlas 2AS rocket with four strap-on solid rocket motors and a Centaur upper stage.

The trajectory of this missile headed south-southeastward, paralleling the coast of Southern California and Mexico, on its trek into space for a 63-degree inclination orbit. About an hour later, and half a world away, the missile released its cargo of a clandestine National Reconnaissance Office ?payload?.

For this early morning launch the only related radio traffic I could hear from Simi Valley was the occasional requests from the US Coast Guard asking for GPS locations of near by vessels. Prior to any missile launch from Vandenberg, notices are made to sea and aviation pilots to avoid certain areas that are clearly marked on their navigation maps.

82. [Freq Of Nature] PHOTOS: Los Angeles City Fire Dispatch Facilities

Yahoo group: freqofnature
Date: 2003-12-07 22:07:39 UTC
From: Tracy Justus
Topic: 82 Message: 82

[Source: Freq Of Nature (http://www.freqofnature.com)]

UPDATE: Photos of the Los Angeles City Fire dispatch facilities have been posted to the Freq Of Nature website.

Tom Rhiel, Senior Technical Director for the Los Angles City Fire Department was kind enough to take us on a behind the scenes tour of the facilities. The tour was a top to bottom (actually bottom to top) peak at all the people and equipment that keeps all the fire fighters in the field in communications with each other and the public.

Our tour started 120 ft below City Hall East in a bomb shelter where fire fighters man posts at dispatch consoles for days at a time. Brian Humphrey, Public Service Officer, happened to be one of the fire fighters on duty while we were visiting the facilities and he was kind enough to take time to visit with us. The tour concluded with a visit to the antenna farm on top of the building and the many racks of radio equipment that they connect to.

83. SOUTHERN CALIFORNIA TRANSIT FREQUENCIES

Yahoo group: freqofnature
Date: 2003-12-06 09:25:14 UTC
From: axjmd
Topic: 83 Message: 83

Besides MTA, BIG BLUE BUS, does anybody know the frequencies for
the following transit authorities?...
norwalk transit(not ct, but ca)
gardena bus lines
montebello bus lines
avta(antelope valley transportation authority)
santa clarita transit
and any other transit authority in southern california if you have
the frequency would be appreciate it.

thank you
joseph dunn

84. [Freq Of Nature] High Altitude Balloon Launch

Yahoo group: freqofnature
Date: 2003-12-16 07:07:18 UTC
From: Tracy Justus
Topic: 84 Message: 84

[Source: SoCalMilCom (http://groups.yahoo.com/group/SoCalMilCom)]

The California Space Institute (University of California, San Diego Branch) will be launching a high-altitude data balloon on Wednesday at about 0800 hrs from Ramona in San Diego County, CA. The balloon will be APRS (Automatic Position Reporting System) (http://www.aprs.org) equipped on 144.340 MHz (note different frequency to reduce interference to regular APRS users). It will be collecting data and sending it back for study by the CalSpace Program.

The coordinators of this launch will be using amateur radio (both voice and APRS) for this event. Plans are to announce the launch on the ECRA Palomar Mountain repeater (147.030+ 103.5 Hz tone) and then switch to the ECRA Monument Peak Calzona repeater (147.24+ 103.5 Hz tone) for "Chase" operations.

Frequencies
147.0300 103.5 Launch net
147.2400 103.5 Chase operations
144.3400 Automatic Position Reporting System

85. [Freq Of Nature] FCC Sets Aside Smart Highway Frequencies

Yahoo group: freqofnature
Date: 2003-12-19 10:47:54 UTC
From: Tracy Justus
Topic: 85 Message: 85

[Source: Associated Press]

By JONATHAN D. SALANT, Associated Press Writer

WASHINGTON - A flashing light in your car lets you know it's safe to change lanes. An alarm warns you at an intersection that another driver is speeding through. A beeping sound tells you you're getting too close to the motorist in front of you.

The information would be broadcast to you from sensors along the highway over special frequencies that no one else could use.

Though the technology is still five to 10 years away, the Federal Communications Commission (news - web sites) on Wednesday set aside an area of broadcast spectrum to transmit those signals, rather than have them share space with electronic toll sensors, cell phones and garage door openers.

The idea is to reduce the 6 million crashes that occur each year on U.S. highways, which kill 42,000 people and cost more than $230 billion, according to the Transportation Department.

87. [Freq Of Nature] Santa to take annual Ventura County helicopter tour tonight

Yahoo group: freqofnature
Date: 2003-12-24 11:35:30 UTC
From: Tracy Justus
Topic: 87 Message: 87

[Source: Ventura County Star (http://www.venturacountystar.com)]

Children spying to see Santa Claus and his reindeer may get their chance tonight (Christmas Eve). Santa is scheduled to take his annual Christmas Eve flight over Camarillo, Oxnard and Ventura, weather permitting.

The helicopter tour, sponsored by Aspen Helicopters of Oxnard, will begin at 6 tonight at the Oxnard Airport. Santa will spend 90 minutes touring the area before landing again about 7:30 PM

For those who hope to catch a glimpse, Santa's complete schedule is:

6:03 PM Oxnard Shores
6:05 PM Silver Strand Beach
6:10 PM Port Hueneme Beach Park
6:13 PM South Oxnard (Hueneme to Pleasant Valley Road)
6:18 PM East Oxnard (Rose Avenue)
6:20 PM La Colonia area
6:25 PM Camarillo Airport
6:30 PM east Camarillo (Lewis Road)
6:35 PM Mission Oaks area
6:40 PM North Camarillo (Las Posas Country Club)
6:45 PM El Rio and Nyeland Acres
6:50 PM Saticoy
6:55 PM east Ventura (Foothill Road)
7:00 PM Foothill and Day Road (Ventura College)
7:05 PM Grant Park area
7:10 PM Ventura Avenue
7:20 PM Ventura fairgrounds
7:25 PM Ventura Keys

NORTH POLE POLICE DEPARTMENT
125 Snowman Lane
North Pole, Alaska 99705

The North Pole Police Department is seeking information on a possible 459 (burglary) subject last seen in the skies over Southern California.

VEHICLE: Red with gold trim, older model home-built sleigh
ALASKA (PERSONALIZED) LICENSE PLATE: NOEL 1
CHARACTERISTICS: Pulled by eight (8) tiny reindeer; displaying a front red light

NAME: Santa Claus
AKA: Saint Nick
SEX: Male
AGE: Old; D.O.B. unknown
WEIGHT: Heavy build
HAIR: White with a full white beard
EYES: Described as ?twinkling?
MARKS: Described as being jolly; belly shakes like a bowl full of jelly
CLOTHING: Subject was last seen wearing all red clothing, a white fur-line trimmed hat and red fur jacket and pants; also wearing black high-top boots and a black patent leather belt.

Witnesses saw the subject landing on several roof tops in residential areas delivering toys to good little boys and girls.

The subject was last seen fleeing the area yelling, "Merry Christmas, peace on Earth and good will to all"

If you have any information regarding this subject please contact the North Pole Police Department or your local law enforcement agency.

DO NOT ATTEMPT TO CONTACT OR DETAIN THIS PERSON UNLESS YOU ARE A SWORN LAW ENFORCEMENT OFFICER.

90. [Freq Of Nature] Radio Monitoring 2003...A Year In Review

Yahoo group: freqofnature
Date: 2003-12-31 08:57:17 UTC
From: Tracy Justus
Topic: 90 Message: 90

[Source: Freq Of Nature (http://www.freqofnature.com)]

The year started with news of a new Radio Shack digital scanner as monitoring hobbyists struggled to keep pace with new public-safety radio systems. Space Shuttle Columbia breaks up on re-entry. New LAPD Police Chief slams news media for covering police chases. Iraq liberated and Saddam Hussain taken into custody. LAFD deploys new fire boats. TeamSpeak Radio Monitoring Network launched. New trunked radio system, ICIS goes online. LAPD opens Valley Dispatch Center. LA County and Burbank City police officers mourned as their murders are hunted down. Grocery store unions take up picket signs. Southern California fires. Governator takes office. The year comes to an end as jet fighter pilots escort foreign airliners through U.S. air space with weapons hot.

92. [Freq Of Nature] Scanner Buff Network

Yahoo group: freqofnature
Date: 2004-01-13 04:23:14 UTC
From: Tracy Justus
Topic: 92 Message: 92

[Source: Freq Of Nature; Scanner Buff Network (http://www.scannerbuff.net)]

Freq Of Nature does not endorse many products or services but once in awhile one will come across our desk that simply demands that we share it with our fellow radio monitoring enthusiasts. The Scanner Buff Network (http://www.scannerbuff.net) is one of these exceptions.

The Scanner Buff Network (SBN) (http://www.scannerbuff.net) is a new website that features free Incident Notifications via e-mail, text messaging and pager e-mail gateways. The website also offers discussion forums and personal storage space for radio frequency databases.

ScannerBuff actually began in 1987 when they released one of the first commercially successful computer applications by the same name, and then ScannerBuff On-Line?. That was back in the days of a 300 baud modem and a BBS.

A major feature of SBN is Incident Notification Groups where you specify the type and severity of incidents that you would like to be notified of. For example, if a pursuit is televised in your area and you select only televised events you will be alerted. If you are interested in three alarm fires, but nothing less, SBN will alert you that an incident is occurring. The alert will contain relevant information, such as dispatch radio frequency, TV channel(s), and an overview of details provided. SBN also provides a User TalkGroup for discussion of in-progress events. Users themselves issue alerts for the benefit of others.

Benefits of SBN

Free
Nationwide Incident Notifications
Nationwide User TalkGroups (Forums)
Fast & Powerful Searchable Databases
User Created Searchable Databases
Your Own Private Database On-Line
Download Receiver Specific Data Files
SBN is perfect for radio and TV stations nationwide, independent ENG reporters, scanning enthusiasts, and TV viewers alike.

96. [Freq Of Nature] FRS Repeater in the San Gabriel Valley

Yahoo group: freqofnature
Date: 2004-01-29 21:18:01 UTC
From: Tracy Justus
Topic: 96 Message: 96

[Source: Freq Of Nature (http://www.freqofnature.com)]

If you live in the San Gabriel Valley then you might want to check out 462.6375 MHz. Someone in the San Dimas area has set up a simplex repeater up on Buzzards Peak using the Family Radio Service (FRS) channel 4 frequency of 462.6375 MHz. This repeater appears to be a FRS radio that basically repeats all radio traffic that it hears on channel 4 and plays it back at the end of the transmission. The repeater seems to have about 60 seconds of record time.

For some additional details about similar FRS repeaters check out the following message thread at the Dominion Group - Survival & Preparedness Forum.

97. [Freq Of Nature] Radio Shack Releases Pro-96 Software Update

Yahoo group: freqofnature
Date: 2004-01-30 04:46:25 UTC
From: Tracy Justus
Topic: 97 Message: 97

[Source: Radio Shack (http://www.radioshack.com); StrongSignals (http://www.strongsignals.net)]

Radio Shack has released a software update for their Pro-96 digital radio scanner. The software update is available free of charge by downloading it from the Radio Shack support web site (Catalog number 200-0526). The software updates the firmware of the radio scanner to version U1.2 which addes the following enhancements to the unit.

Automatic detection, tracking and decoding of CQPSK LSM modulation

Compatible Quadrature Phase Shift Keying (CQPSK) is a type of digital modulation used in certain newer digital simulcast trunked radio systems. These newer systems operate with the 9600 bps P25 control channel and utilize Linear Simulcast Modulation (LSM). The original version of PRO-96 DSP firmware was not designed to decode LSM CQPSK modulation. This version enables automatic detection, tracking and decoding of LSM CQPSK signals. Please note that this upgrade has not been tested with APCO Project 25 Phase II 6.25 kHz CQPSK signals, and is not intended to provide APCO Project 25 Phase II 6.25 kHz CQPSK functionality.

Fine tuned digital audio level

Some users reported that digital audio levels are noticeably louder than analog audio levels. The digital audio level was adjusted to better match typical analog audio levels. Note that analog audio levels will vary depending on the type of system, modulation deviation, and the way individual analog systems are adjusted and used.

Improved C4FM performance in weak signal conditions

Enhancements were made to the digital decoder to provide improved digital performance in weak signal areas while maintaining automatic detection and tracking of the supported digital modulation formats (C4FM-Wide, C4FM, CQPSK-LSM).

98. [Freq Of Nature] ARRL to Propose New Entry-Level License, Code-Free HF Access

Yahoo group: freqofnature
Date: 2004-02-01 08:18:03 UTC
From: Tracy Justus
Topic: 98 Message: 98

[Source: Robert Traylor and ARRL (http://www.arrl.org)]

NEWINGTON, CT, Jan 19, 2004--The ARRL will ask the FCC to create a new entry-level Amateur Radio license that would include HF phone privileges without requiring a Morse code test. The League also will propose consolidating all current licensees into three classes, retaining the Element 1 Morse requirement--now 5 WPM--only for the highest class. More... 100. [Freq Of Nature] X-43A Completes Captive-Carry Flight

Yahoo group: freqofnature
Date: 2004-02-02 03:32:11 UTC
From: Tracy Justus
Topic: 100 Message: 100

[Source: Space Archive (http://www.spacearchive.info) by Brian Webb]

NASA successfully completed a dress rehearsal for this month's flight of its unmanned X-43A research vehicle. A B-52 bomber carrying the X-43A/Pegasus booster combination left Edwards AFB last Monday afternoon at 15:21 PST, crossed the coast, and flew a predetermined path over the Pacific Missile Test Range. The B-52 and chase aircraft later returned to Edwards and landed at 17:28 PST.

The X-43A stack consists of a large solid fuel rocket tipped with the X-43A hypersonic research vehicle. Since this was a captive-carry mission, the stack remained attached to a pylon on the B-52's wing for the entire two-hour flight.

The mission was a dress rehearsal for a launch of the X-43A tentatively set for February 21st. The flight will evaluate supersonic combustion ramjet (scramjet) technology.

During last Monday's captive-carry mission, Ventura County residents spotted contrails and heard radio communications from the B-52 and chase aircraft.

101. [Freq Of Nature] X-43A Flight Delayed

Yahoo group: freqofnature
Date: 2004-02-16 07:37:57 UTC
From: Tracy Justus
Topic: 101 Message: 101

[Source: Space Archive (http://www.spacearchive.info) by Brian Webb]

The February 21st reflight of NASA's X-43A hypersonic research vehicle appears to have been delayed for at least a week due to a booster software issue. Designed to demonstrate air-breathing engine technology at speeds above Mach 5, the unmanned X-43A is now scheduled to fly no earlier than February 28th.

On launch day, observers may be able to spot the contrails from the F-18 chase planes and the B-52 bomber carrying the X-43A/Pegasus booster combination as they fly from Edwards AFB to the launch point offshore. The contrails from the chase planes and mother ship may also be visible as they return to Edwards.

There's a good chance that favorably placed observers will also see the smoke trail from the Pegasus booster as it pushes the X-43A to its operating altitude of 95,000 feet. In addition, suitably equipped radio enthusiasts across a wide area should be able to hear radio communications from the F-18s and the B-52.

The X-43's first flight occurred in June of 2001. The release from the B-52 was normal, but the flight was terminated by ground controllers when the Pegasus booster/X-43A went out of control shortly after booster ignition.

LOS ANGELES--The Los Angeles Police Department, Planning and Research Division will host the Grand Opening Ceremony of the Valley communications Dispatch Center. This event will mark the grand opening of the newest dispatch center for the City of Los Angeles.

The Valley Communications Dispatch Center will provide police service to more than 1.3 million people, who reside in the 223 square mile area of the San Fernando Valley.

The new Valley Communications Dispatch Center is located at 23001 Roscoe Boulevard in West Hills. The Grand Opening will be Monday, February 23rd starting at 10:00 a.m.

Please contact the Los Angeles Police Department's Public Relations Department for more information.

Well, it's that time of year again when the stars come out to claim a little gold statue and the bragging rights that go along with it. We have the radio frequencies for you. The 'Hollywood & Highland Frequencies' are those commonly used for events at the Kodak Theatre. The long list of frequencies 'Probable Oscar Awards Show Frequencies' are those that are most probable to be used at this year?s event. The folks at Bearcom have licensed these frequencies for this years show. As show some nears we will try to detail this list with which frequencies are in use and what you can expect to hear on them.

The official Oscar website is http://www.oscar.com

Hollywood & Highland Frequencies
461.4625 127.3 Security
463.3125 162.2 Event Services
463.3375 218.1 Operations
463.4625 91.5 Parking
464.6625 141.3 Food Services

Probable Oscar Awards Show Frequencies

107. [Freq Of Nature] Winter Storms

Yahoo group: freqofnature
Date: 2004-02-25 03:40:36 UTC
From: Tracy Justus
Topic: 107 Message: 107

[Source: NWS; NOAA; Skywarn]

With a significant winter storm on the horizon several emergency services organizations are getting ready to spring into service. One such group is the storm spotters of Skywarn. Skywarn is a national effort to save lives during severe weather emergencies with an expanding network of amateur radio spotters.

From Skywarn, NWS, San Diego

"The NWS has activated Skywarn for the entire Southwest California Region starting tomorrow at (Wednesday February 25th) 1800 hrs (6pm).

The activation will go until further notice. Following is an excerpt from the activation notification:

We are looking at a major Pacific storm to be entering our area beginning Wed evening. At this point it looks to rival the Christmas storm in intensity and rainfall.

Rainfall amounts could be as much as 7 inches in the San Bernardino's, 6 inches in the Santa Ana's, and 5 inches in the Riverside and San Diego County Mountains. Coastal valleys could see 1.5 to 3 inches of rain.

Snow levels will be high, but behind the front in instability snow showers/squalls there could be up to a foot of snow in the San Bernardino County Mountains. Heavy steady rain is the threat Wed night and early Thursday, with lighter showery precipitation behind the front Thursday and possibly into Friday."

108. [Freq Of Nature] Jail Term Enforces Temporary Radio Silence on Former Amateur

Yahoo group: freqofnature
Date: 2004-02-28 00:19:01 UTC
From: Tracy Justus
Topic: 108 Message: 108

[Source: ARRL (http://www.arrl.org)]

NEWINGTON, CT, Feb 27, 2004--All's quiet on the Western Front--at least for the time being. Now that former amateur licensee Jack Gerritsen, ex-KG6IRO, of Bell, California, is back behind bars until March 24, Los Angeles-area Amateur Radio repeater owners and law enforcement agencies are breathing a short sigh of relief. Hams and police have long complained to the FCC that Gerritsen has been illegally transmitting on repeaters using the ham radio call sign he'd held for about a week in 2001 and has been jamming public safety transmissions.

Some two dozen amateurs and a handful of law officers were on hand to see Gerritsen get his day in federal court February 23 on a relatively minor charge that he ignored a posted entryway to the courthouse roof--reportedly with a portable transceiver and extra batteries in hand. Federal Judge Carolyn Turchin said the battery pack, wrapped in black electrical tape, looked like a possible bomb to the officers who arrested him.

109. [Freq Of Nature] Crime not seen in Nevada patrol radio fiasco

Yahoo group: freqofnature
Date: 2004-03-10 01:45:18 UTC
From: Tracy Justus
Topic: 109 Message: 109

[Source: Associated Press]

CARSON CITY, Nevada -- Improper spending of millions of dollars on the wrong communications equipment for the Nevada Highway Patrol won't result in any criminal charges, the state attorney general's office says.

Gerald Gardner, chief deputy of the criminal division, said the four-month review of an investigation by the patrol found there were "certain improprieties" by former communications supervisor Mel Pennington involving the purchase of radios.

"But there was no evidence of any intent on his part to further his own personal gain or benefit any other person," Gardner said Monday.

Because of Pennington's actions, the highway patrol was operating on 150-megahertz frequencies for which it lacked authorization from the Federal Communication Commission. The federal agency told the patrol to get off those frequencies, which were licensed to others.

110. [Freq Of Nature] New EAS Event and SAME Codes

Yahoo group: freqofnature
Date: 2004-03-12 02:37:48 UTC
From: Tracy Justus
Topic: 110 Message: 110

[Source: National Weather Service (http://www.nws.noaa.gov)]

On Wednesday, June 30th the National Weather Service (NWS) weather forcast offices will implement new Emergency Alert System (EAS) event codes in messages broadcast on NOAA Weather Radio (NWR) in a few areas of the country. NWS offices have previously announced and implimented one or more of the new EAS event codes in partnership with local or state emergency communications committees.

NOAA Weather Radio is the primary means for NWS alerts to activate the EAS. EAS event codes are equivalent to Specific Area Message Encoding (SAME) codes used by SAME-capable NWR receivers to allow listeners to program desired alert messages. This change has no impact on NWR listeners with NWR receivers that do not use the SAME technology for alerts. More... (http://www.nws.noaa.gov/os/notifications/scn04-10eas_event_nwr.txt)

The City of Los Angeles will sponsor the 13th Annual Emergency Preparedness Fair during the month of April. Free emergency preparedness information and a limited number of sample emergency kits will be available for attendees at six events across the city throughout the month. The American Red Cross of Greater Los Angeles will be on hand to demonstrate how to assemble a disaster kit.

Learn how to prepare your home, family and business for emergencies. Participating Departments and Agencies include: Fire, Police, Emergency Preparedness, Building & Safety, Public Works, Water & Power, Disability, Housing, Community Redevelopment, Aging, Airports, Recreation & Parks, American Red Cross, County and State Agencies. Emergency response equipment and life-saving techniques will be demonstrated at various times throughout the day.

From: Tracy Justus
Topic: 113 Message: 113

[Source: Ventura County Star (http://www.venturacountystar.com)]

The city of Simi Valley will phase in a $6.4 million digital two-way radio system over the next two years that will provide the ability to communicate with other cities throughout Ventura County and the San Fernando Valley in the event of an emergency.

"This is the latest, state-of-the-art technology," Councilman Glen Becerra said. "It truly allows us to communicate with other areas, which is important during a ... disaster."

Public works, sanitation and water works departments are scheduled to be up and running with the new radio system by March 2005 and the Police Department by December 2005.

114. [Freq Of Nature] NASA's X-43A Hypersonic Aircraft Ready For Flight

Yahoo group: freqofnature
Date: 2004-03-26 03:19:40 UTC
From: Tracy Justus
Topic: 114 Message: 114

[Source: NASA Dryden Flight Research Center (http://www.dfrc.nasa.gov)]

NASA has set Saturday, March 27, for the flight of its experimental X-43A hypersonic research aircraft. The unpiloted 12-foot-long vehicle, part aircraft and part spacecraft, will be dropped from the wing of a modified B-52 aircraft, boosted to nearly 100,000 feet altitude by a booster rocket and released over the Pacific Ocean to briefly fly under its own power at seven times the speed of sound, almost 5,000 mph.

The flight is part of the Hyper-X program, a research effort designed to demonstrate alternate propulsion technologies for access to space and high-speed flight within the atmosphere. It will provide unique "first time" free flight data on hypersonic air-breathing engine technologies that have large potential pay-offs.

This will mark the first time a non-rocket, air-breathing scramjet engine has powered a vehicle in flight at hypersonic speeds, defined as speeds above Mach 5 or five times the speed of sound.

The X-43A will fly in the Naval Air Warfare Center Weapons Division Sea Range over the Pacific Ocean off the coast of Southern California. After booster burnout, the 2,800-pound, wedge-shaped research craft will separate and fly on its own to perform a preprogrammed set of tasks. After an approximate 10-second test firing of the engine, the X-43A will glide through the atmosphere conducting a series of aerodynamic maneuvers for up to six minutes on its way to splashdown.

This will be the second flight in the X-43A project. On June 2, 2001, the first X-43A vehicle was lost moments after release from the wing of the B-52. Following booster ignition, the combined booster and X-43A vehicle deviated from its flight path and was deliberately destroyed. Investigation into the mishap showed that there was no single contributing factor, but the root cause of the problem was identified as the control system of the booster.

For this flight, the B-52 will carry the booster with the attached X-43A to at least 40,000 feet before its release, versus the 24,000 feet of the first attempt. This will help reduce atmospheric loads on the booster's control surfaces. The booster will carry the X-43A research vehicle to approximately the same test conditions -- altitude and speed -- as planned for the first flight.

NASA Television will carry the flight and the post-flight news briefing live. NASA TV is available on AMC 9, transponder 9C, 85 degrees west longitude, vertical polarization with a frequency of 3880 MHz and audio of 6.8 MHz.

116. [Freq Of Nature] Rescue Teams Challenge Each Other at 13th Annual Emergency Preparedness Fair

Yahoo group: freqofnature
Date: 2004-04-01 06:02:08 UTC
From: Tracy Justus
Topic: 116 Message: 116

[Source: BICEPP (http://www.bicepp.org)]

The City of Los Angeles Emergency Preparedness Department and the Business and Industry Council for Emergency Planning and Preparedness (BICEPP) are co-hosting an Emergency Preparedness Fair at 9 a.m. on Saturday, April 3rd at the Los Angeles Convention Center (West Hall), 1201 S. Figueroa Street, in Downtown Los Angeles. Admission to the fair is free.

The challenge will be divided into the Corporate Business Division and the Community Division. Each team of 10 members will compete in seven events that will test their skills in emergency response. Events include Triage, Patient Packaging and Transport, Medical Aid, Lifting and Cribbing, Search Room, Fire Safety and Suppression, and Command.

"I am excited about this team challenge,? said Ellis Stanley, General Manager of the City's Emergency Preparedness Department.

"Competitive events like these simulate emergencies and help us test our life-saving skills when our adrenaline levels are elevated. Los Angeles is better prepared because of all the organizations that BICEPP and the City have brought together for this challenge."

The following companies will be competing in the Corporate Business Division: Amgen Inc.; Universal Studios; Warner Bros. Studios; Edison International; Herbalife Inc.; and Toyota Motor Sales USA.

The Community Division competition is scheduled for 9 a.m. on Sunday, April 4th. Community Division teams include: City of Los Angeles; City of Simi Valley; City of Burbank; City of Carson; City of San Juan Capistrano; Snohomish County in Washington; and the City of Santa Clarita.

"The goals are the same for business and residents during a crisis. We want to train everyone to be able to take care of themselves, their business and their loved ones immediately after an emergency because it may take a few days before local authorities can help with an organized response," said Chris Wright, BICEPP Vice President, Private Sector.

BICEPP's judging criteria for the event is based on the Community Emergency Response Team (CERT) program, a local training component of Citizen Corps which is supported by the Federal Emergency Management Agency, now integrated into the Department of Homeland Security.

Using a model created by the Los Angeles City Fire Department, CERT trains community members and organizations to support local emergency responders in natural and man-made disasters.

BICEPP's mission is to provide a forum for information exchange to enhance emergency preparedness and contingency planning within the business community. BICEPP and the City of Los Angeles have been partners in preparedness since BICEPP's inception in 1983.

BICEPP and the City of Los Angeles are sponsors of this event along with, Worksafe Technologies, SOS Survival Products, GO SERV, and Water Preserver Concentrate.

The ERT challenge is just one reason for families to attend the Fair. Free emergency preparedness information and sample emergency kits will be available for attendees at six events across the city throughout the month. The American Red Cross of Greater Los Angeles will be on hand to demonstrate how to assemble a disaster kit.

Several city departments including the Los Angeles Police and Fire Departments, Department of Water and Power, Building and Safety and the American Red Cross will be on-hand to distribute emergency preparedness information and other giveaways. Emergency response equipment and life-saving techniques will be demonstrated at various times throughout the day.

Free sample emergency kits will be available for the first 300 families at each event.

[Source: Tracy Justus]

Photos from this years Business and Industry Council for Emergency Planning and Preparedness (BICEPP) Emergency Response Teams (ERT) Challenge have been posted to the Freq Of Nature web site. This was the first year that community teams have competed where previous years events only featured commercial teams. The commercial teams competed on Saturday, April 3rd and the community teams competed the next day on April 4th. This year the Simi Valley CERT team came in strong, winning three of the six events.

Low power Motorola UHF business radios were used at the event so team commanders could communcate with their "on-scene" members. The Simi Valley team used 462.25 MHz with a PL of 91.5

120. [Freq Of Nature] Instrument Flight Rules (IFR) Supplement

Yahoo group: freqofnature
Date: 2004-04-19 07:16:23 UTC
From: Tracy Justus
Topic: 120 Message: 120

[Source: AirCommSouthwest (http://groups.yahoo.com/group/AirCommSouthwest/)]

The latest edition of the IFR Supplement is now available.
EFFECTIVE 15 APR 2004 TO 10 JUN 2004

Download the document at...
https://164.214.2.62/products/digitalaero/terminals/ENROUTE_ZIP/usifr_sup.zip

The IFR Supplement U.S. lists United States air base and Air Route Traffic Control Center (ARTCC) frequencies and those of civilian airports with military utility value. Like commercial and general aviation documents this publication is updated several times each year to provide the most current information to aviators.

Radio monitoring hobbyists will find this document useful for not only aviation radio frequencies but the lists of five-letter airspace fixes that are heard on the radio.

NOTE: This is a 7 MB download in ZIP format that manually extracts to PDF to be viewed on your computer.

On the way to the IFR Supplement download you will encounter a "secure connection" screen, click "ok" and click "yes" to the subsequent "security certificate" screen.

The publication is 800+ pages though easy to navigate, especially with "Adobe? Reader? 6.0.1, full version"
(formerly Acrobat? Reader).

http://www.adobe.com/products/acrobat/alternate.html#601uxall

With the IFR Supplement open, click on the "+" to the left of "Section B" and scroll down to the base, airport, airspace fix, or ARTCC of your choice and click on it.

To do searches for frequencies or whatever, use Ctrl-F.

122. [Freq Of Nature] March Field Airfest 2004

Yahoo group: freqofnature
Date: 2004-04-21 10:06:39 UTC
From: Tracy Justus
Topic: 121 Message: 122

[Source: March ARB (http://www.afrc.af.mil)]

After three silent years, the skies over March ARB will once again be filled with various aircraft performing acrobatic maneuvers for Air Fest 2004.

Air Fest 2004 is scheduled for April 24-25, 2004. The event will mark the fourth air show at March Field since realignment in 1996. Highlighting this year?s show will be the world famous USAF Thunderbirds demonstration team.

123. [Freq Of Nature] Verified March ARB Airfest 2004 Radio Frequencies

Yahoo group: freqofnature
Date: 2004-04-25 03:35:11 UTC
From: Tracy Justus
Topic: 123 Message: 123

[Source: Tracy Justus; Robert Eisner]

Radio monitoring hobbyists were busy watching acrobatic displays in the sky as well as taking note of frequencies in use at the event. Below are radio frequencies that were most busy during the air show on Saturday. In addition to programming these verified frequencies in your radio scanner you should use your search feature to find those ellusive frequencies. Suggested search ranges include:

225-399 Aviation UHF (Military Air)
137-144 Military (AM Mode for Thunderbirds)
148-174 VHF

Base Operations
148.2350 MAINTENANCE CH-1
148.1750 131.8 MAINTENANCE CH-2
149.1750 CSQ MAINTENANCE CH-3
149.2350 141.3 MAINTENANCE
150.0500 MAINTENANCE E
165.0625 146.2 SECURITY CH-1
164.7000 103.5 SECURITY CH-2
150.1750 FUEL
150.2550 82.5 MEDICAL
150.3450 141.3 FIRE/CRASH
150.4250 103.5 RAMP

US Air Force Thunderbirds
141.8500 COMM TESTS
143.8500 DIAMOND AIR/AIR (AM MODE)

Air Show Control
134.7500 ATIS
239.0500 ATIS
127.6500 TOWER (AIR BOSS)
253.5000 TOWER (AIR BOSS)
121.7500 GROUND
335.8000 GROUND
126.4000 LOCAL CONTROL (PERFORMERS DISCRETE)
396.0000 LOCAL CONTROL (PERFORMERS DISCRETE)
133.5000 MARCH APPROACH
324.1000 MARCH APPROACH

A couple of call signs
US Border Patrol MD600D Helicopter FOXTROT 6

124. [Freq Of Nature] Uniden Releases Radio Scanner Control Protocols

Yahoo group: freqofnature
Date: 2004-04-30 10:08:02 UTC
From: Tracy Justus
Topic: 124 Message: 124

[Source: Uniden (http://www.uniden.com)]

Over the past few years Uniden's marketing department refused to release their proprietary control codes for their radio scanners to third party developers. Uniden had historically released these documents which resulted in making these computer controlled radio scanners the most popular models on the market thanks to the numerous software products available for them.

Starting with the release of the BC250D, Uniden started marketing their own software which received a very poor reception by the radio scanner community because of the poor quality of the product. The CD included with these expensive radio scanners frequently ended up keeping the packaging material company in the trash can.

Thanks to the dedication of hobbyists and software developers these control codes had been hacked so that third party software could be available for these radio scanners.

Uniden has finally seen the error in their marketing plan and have released these documents to the public.
You can download these documents in PDF format from the Uniden download page at the following address.

http://www.uniden.com/productsupport_downloads.cfm

It should be noted that these software control code documents are for deleloping software for these radio scanners. If you are not familiar with software programming and serial communications these documents will be of no use to you. Uniden, understandably, will not provide support for these control codes.

126. [Freq Of Nature] Team doesn't wait for disasters to help

Yahoo group: freqofnature
Date: 2004-05-04 10:13:32 UTC
From: Tracy Justus
Topic: 126 Message: 126

[Source: Ventura County Star (http://www.venturacountystar.com); Photos by Tracy Justus]

By Roberta Freeman
May 3, 2004

On April 16, John Saffelo made an early evening trip to a Simi Valley auto parts store. When he climbed back into his truck, he heard an alarming call on his police scanner.

The dispatcher said a body was lying across the railroad tracks along Los Angeles Avenue just west of Erringer Road.

Like other members of Simi Valley's volunteer Disaster Service Worker platoon, Saffelo, 38, said he keeps the scanner in his truck to "hear what's going on."

Normally, he would never interfere with a police call, but he decided to step in when police told the dispatcher they were caught on the opposite side of the tracks by a train speeding toward the body a few miles away.

Realizing he was just around the corner, Saffelo sped to the scene. When he arrived he saw the body was in fact a live teenager. Another resident, Daniel Murphy, was unsuccessfully attempting to pull the teen off the tracks.

Saffelo, a senior member of Simi Valley's emergency platoon, had undergone extensive training from Amtrak in rail accidents and did some quick calculations as the train approached about 400 yards away.

"I did some quick math and thought, 'I can pull this off safely,' " he said. "It didn't look like Danny and the kid were going anywhere."

So with five seconds to spare, Saffelo said he pushed them off the tracks, then made sure the teen stayed down until the train had passed.

Murphy later admitted to police he wasn't going to let the teen go, and realized later it would have meant certain death for both of them. Murphy and Saffelo are going to receive commendations for their heroic efforts May 17 from the City Council.

Saffelo credits his emergency volunteer training organized by the city for giving him the confidence to act quickly.

"The training gave me an above average confidence level, but this wasn't a cowboy stunt," he said. "I thought I could make it and I did."

Simi Valley's Disaster Service Worker platoon is a new enterprise that evolved from the Community Emergency Response Team training program developed after the 1994 Northridge earthquake. The CERT program aims to teach residents the basics of taking care of their families and neighbors after an earthquake or other disaster.

Rigorous training program

Members of the Disaster Service Worker platoon, however, continue beyond CERT's eight-week training program, committing themselves to a rigorous training program for a year longer.

Bruce Wilson, a member of the city's Emergency Services Department who oversees the program, thought there was a need for a core group of better-trained residents to meet the demands of 911 services during a major incident.

About eight months ago, 50 people, including Saffelo, signed on to undergo the monthly training and participate in a scheduled exercise four times a year, agreed to be on-call and promised to respond when summoned for an emergency.

For their efforts, the group will be eligible for workers' compensation benefits if injured while performing their duties.

To date, the group has received training in mass-casualty air crash incidents, hazardous materials spills, rail transportation accidents, team leadership and disaster sheltering. The Ventura County Fire Department and Amtrak have led some of the sessions.

Many in the group have also committed to taking an emergency medical technician course through the Simi Valley Adult School. The Simi Valley Police Foundation has agreed to reimburse half of the tuition upon completion of the one-year course.

National skills competition

Last month, the platoon learned about a national skills competition sponsored by the Business and Industry Council for Emergency Planning and Preparedness held at the Los Angeles Convention Center.

With fewer than 90 days to prepare, the group teamed up with Fire Station 41 in Simi Valley for extra hours of training that helped them take home honors for lifting and cribbing -- taking big loads of weight off people using teamwork and leverage --command and fire safety and suppression.

"I give great kudos to the City Council for agreeing to try something new," Wilson said. He said he believes the program is proving so successful it likely will be used as a model for other cities around the country.

The group soon will take responsibility for a 26-foot medical supplies trailer for the county funded by the federal Homeland Security Department.

Wilson continues to beat the bushes for funding or grants he can find to outfit the platoon, which is not fully equipped.

The group was most recently pressed into service during the October wildfires, when members worked 24 to 36 hours straight, providing supplies for firefighters, occasionally napping on cots at the police station.

A close group

Saffelo and the others on the platoon agree it is a worthwhile effort and have grown into a close group. Men and women of all ages are part of the group, representing a variety of day jobs, from sales representatives to nurses. Saffelo is a building engineer for Farmers Insurance.

Carol Thomaier, a registered nurse, lives in the Texas tract, where she sees dozens of kids every day. Single and without children, she sees joining the team as "the perfect opportunity to go out into the community and help."

Most agree that serving on the platoon is a way to serve their community and help their neighbors in a time of need.

As Saffelo said, "We are like an extended family."

Get in touch

For more information about the Community Emergency Response Team or the Disaster Service Worker platoon, call Bruce Wilson at 583-6238.

128. [Freq Of Nature] LAFD Fire Service Recognition Day - Annual Open House

Yahoo group: freqofnature
Date: 2004-05-06 08:49:51 UTC
From: Tracy Justus
Topic: 128 Message: 128

[Source: Brian Humphrey, PSO Los Angeles Fire Department]

The men and women of the Los Angeles Fire Department welcome you to visit any Neighborhood Fire Station in Los Angeles on...

FIRE SERVICE RECOGNITION DAY
Saturday, May 8, 2004
10 AM to 4 PM

This popular Southern California event is Los Angeles City Fire Departments Annual Open House - when every Neighborhood Fire Station in Los Angeles will be open and expecting your visit. Bring your scanner to hear the LAFD in action:

http://www.lafd.org/freqncy.htm

This is your chance to closely examine Fire Apparatus and Equipment (including radios), meet your Neighborhood Firefighters and Firefighter/Paramedics, learn about Fire Department career opportunities and how to be prepared for any disaster. The theme of this year's event is:

"Preparedness Isn't Someone Else's Job... It's Everyone's Job!"

Come meet the men and women who proudly protect Los Angeles and take advantage of free Blood Pressure Checks and up-close demonstrations of equipment you normally see only from afar.

While every Neighborhood Fire Station will be open and expecting your visit between 10AM and 4 PM this coming Saturday:

http://www.lafd.org/fsd.htm

...several sites will also be hosting special regional LAFD Demonstrations:

- SHERMAN OAKS 5101 North Sepulveda Boulevard (the biggest event, which will also be hosting a booth from the Southern California Monitoring Association)

- WOODLAND HILLS Topanga Canyon X Victory Boulevard

- TUJUNGA 7777 Foothill Boulevard

- PACIFIC PALISADES 15045 Sunset Boulevard

- DOWNTOWN Olvera Street

- SAN PEDRO Ports O'Call Village (with Fireboats on Display!)

- MID CITY Exposition Park - 900 Exposition Boulevard

- HOLLYWOOD 1327 North Cole Avenue **

**The LAFD Historical Society will be providing a pancake breakfast at the LAFD Museum located adjacent at 1355 Cahuenga Blvd in Hollywood. It's a great place to start the day!

http://www.lafd.org/pancake.pdf

Admission to the Museum is free!!

The Los Angeles City Fire Department wants to make this event fun and accessible for everyone. Sign Language Interpreters, assistive listening devices, or other auxiliary aids and/or services may be provided upon request. To ensure availability, 72-hour advance notification is requested. For more information contact the LAFD Community Service Unit: (213) 978-3820.

The Los Angeles City Fire Department looks forward to seeing you at a Neighborhood Fire Station this Saturday, May 8th from 10 AM to 4 PM. Don't forget your camera or your scanner!

[Source: Freq Of Nature]

Photos from the Simi Valley Emergency Preparedness Expo have been posted to the Freq Of Nature web site. This year's event included K-9 demonstrations from Simi Valley Police and Ventura County Sheriff. Also at this event were the Ventura County Fire apparatus from Station 41, The American Red Cross and their Disaster Relief vehicle, Simi Valley CERT/DSW, several Simi Valley Police Department units, Simi Valley ARES/RACES and many others.

The Simi Valley Police Communications Unit had the updated police beat map on display. A new police beat map has been created for the FON Simi Valley Police page.

The Simi Valley CERT booth had photos of their activities on display including the 2003 Simi Valley Fire incident. Many residences commented that they remembered these folks canvassing their neighborhood with evacuation instructions in advance of the fire. In addition to information about CERT they provided pamphlets on home safety.

A little known feature of the Freq Of Nature web site are the VIP documents that are only available to donators. This is our way of saying ?Thanks!? to those who support Freq Of Nature.

The VIP documents are updated twice a month so you will have access to the most current radio monitoring information available.

Documents are in PDF format so they can be read any computer operating systems that can run the free Adobe Acrobat? Reader software. By giving you the option of printing these documents on your own printer your donation will go farther to maintaining the Freq Of Nature web site.

Featured documents include:

Southern California Radio Frequencies
This is actually two documents, one sorted by radio frequency and the other sorted by entity (the folks using the radio frequency). The output tone is included along with the use of the radio frequency. This document is especially useful to radio technicians as well as radio monitoring hobbyists in identify interfering radio signals and identifying the entity.

Arizona Radio Frequencies
Like the Southern California Radio Frequency document this is also a two part document, one sorted by radio frequency and the other sorted by entity.

Military Air Call Signs
This is a comprehensive list of radio call signs which are necessary for enjoying the vast amount of military radio traffic from Area-51 to San Diego and beyond. The list identifies the aircraft type along with their unit number and base.

...and more documents

To gain access to these documents, simply click on the Make a Donation button. You will be directed to our PayPal Merchant account where you can make a donation. Once your donation has been processed you will be directed to the VIP documents page. If you have any questions or comments please don't hesitate to e-mail us at comments@freqofnature.com

Happy Monitoring!

[Source: Tracy Justus]

On April 16th, 2004 around 4:00 p.m. a young man purportedly attempted to take his life by laying on the railroad tracks near Erringer Rd and Los Angeles Ave. Daniel Murphy, a Simi Valley citizen, noticed the young man and called 911. Daniel was attempting to remove the young man from the tracks as a train approached. Just before the train reached them, John Saffelo tackled them both from the tracks just in the nick of time.

John recently went through training with Metrolink as part of the Simi Valley Community Emergency Response Team. From that training John knew how fast the train was traveling and quickly calculated that he could safely intervene.

On May 17th, 2004 the City of Simi Valley showed their appreciation to Daniel and John for their selfless heroic acts by presenting Certificates of Commendation along with a standing ovation.

3rd Annual Wildland Fire & Safety Expo
Preparing for Fire Season 2004

Ventura County Fire Department
Headquarters/Regional Training Center
102 E. Durley Avenue, Camarillo (Camarillo Airport)

Saturday, May 22, 2004 from 10:00 a.m. to 3:00 p.m.

The Wildland Fire & Safety Expo provides the public and the media, with wildland fire & general fire safety education, information and necessary measures to be taken in preparing for fire, and to enhance the capability for firefighters to do their job. Learn why we are at risk for devastating fire and what can be done to mitigate dangers.

Every year in the United States, wildfires burn millions of acres of precious vegetation, destroying thousands of structures with fire suppression costs well over 640 million dollars. Increasingly, flames have taken a heavy toll in California. It is not a question of if another wildland conflagration such as the Simi Fire will occur; it is a question of when it will occur . California has one of the most severe wildfire environments in the world because of its unique combination of population, vegetation, topography, climate, and the encroachment of development in the wildland urban interface.

Community action is essential for wildfire safety. Everyone – residents, business owners and local officials – must take the necessary measures to prepare for fires and to enhance the capability for firefighters to do their job. It is with this goal in mind that the Ventura County Fire Department invites you to the 3rd Annual Wildland Fire & Safety Expo and discover what you can do to save lives, property and natural resources.

Talk with firefighters, vendors, and other public safety officials on how to protect your home and property from wildfires. View fire apparatus and wildland firefighting demonstrations. Learn about building construction in the Urban Wildland Interface as well as how to provide for your animals and pets during fires. Visit the Fire Safety House and practice your escape plan then let the kids tackle the Junior Firefighter Challenge. This is a free event and the whole community is welcomed!

Benefiting the Los Angeles Fireman's Relief Fund
The Largest Firefighter's Appreciation Event In The Nation

The men and women of the Los Angeles Fire Department invite you to join them and corporate leaders of LA's Bunker Hill area at:

Hope For Firefighters
Thursday, June 3, 2004
11:00 AM - 2:00 PM

http://www.hopeforfirefighters.org

It all takes place on Hope Street between 3rd and Hope Place in the Bunker Hill area near downtown Los Angeles. All are welcome!

The Bunker Hill Community of Los Angeles will demonstrate their appreciation for the Los Angeles Firefighters through a celebration with entertainment, firehouse food and fir Muster games. This event is designed to bring the downtown community together and will benefit the Los Angeles Fire Department's Widow and Orphans Fund.

Hope Street between 3rd and Hope Place will be closed to make way for the thousands of people who will be attending.

Corporate teams from local businesses will compete in Firefighter Muster games featuring the Bucket Brigade, Firefighter Suit Up Competition and Old Fashion Hose Pull Contest. Fire stations will partner up with local business sponsors to present a variety of food booths featuring a taste of the firehouse prepared and served by the firefighters themselves.

135. [Freq Of Nature] LAPD Code-2/High is 10-7

Yahoo group: freqofnature
Date: 2004-05-28 10:00:57 UTC
From: Tracy
Topic: 135 Message: 135

[http://www.lapdonline.org]

[Source: Los Angeles Police Department (http://www.lapdonline.org); SoCalScan (http://groups.yahoo.com/group/socalscan/)]

As of May 16, 2004, the Los Angeles Police Department (LAPD) had changed the policy in which radio calls are dispatched to patrol officers. There were two major changes to the new policy. The classification Code Two High has been eliminated and calls are now categorized as either Emergency or Urgent.

Code-3 - Established LAPD policy states that a Code Three response shall be answered immediately and in a manner which will enable the responding unit to reach the scene as quickly as possible with safety. Exemption from provisions of the Vehicle Code (rules of the road) is allowed only when officers sound a siren and the officers' vehicle displays a lighted red lamp visible from the front. This is commonly called a "red lights and siren" response.

Code-2 - A Code Two response is an urgent call and shall be answered immediately. The red light and siren shall not be used, and all traffic laws shall be observed.

It is anticipated by the LAPD that the modification of the previous policy will result in a more effective management of calls for service. It is the judgment of the dispatchers, supervisors and responding officers that determines whether a call warrants an Emergency or Urgent classification. The new policy will still allow dispatched officers the ability to upgrade or downgrade their response should they have additional information that warrants the change.

After the first week of no Code-2/High calls, LAPD responded Code-3 a little over 2,700 times. Previous average was about 400-500 Code-3 calls a week. Average response time dropped from the previous 10.6-11 minutes to about 7 minutes. It is entirely too soon to draw any real conclusions on the significance of this change of policy though.

For more information on this LAPD change of policy, please visit the official LAPD web site at www.lapdonline.org (http://www.lapdonline.org)

[Source: South Bend Tribune (http://www.southbendtribune.com)]

INDIANAPOLIS -- As Sarah Fisher slowed with the rest of the Indianapolis 500 field during an early race caution, an unfamiliar but encouraging voice in her radio earpiece suggested she move up in the race.

The advice wasn't from her pit crew. It came from a man claiming to be a fan.

138. [Freq Of Nature] Uniden announces BC246T compact trunking scanner

Yahoo group: freqofnature
Date: 2004-06-03 09:32:29 UTC
From: Tracy
Topic: 138 Message: 138

[http://www.uniden.com]

[Source: Uniden (http://www.uniden.com)]

Close CallTM RF Capture Technology Unveiled

FORT WORTH, Texas, June 1, 2004 - Uniden America Corporation today announced its latest trunking scanner, the BC246T. Representing the first in a new generation of compact handheld scanners, the BC246T introduces several innovative new features, including Uniden’s exclusive Close CallTM RF Capture Technology. The BC246T will be available in the fall of 2004. The BC246T uses a new dynamically allocated memory system, allowing the user to program its 3300+ channels into any configuration desired. While traditional scanners have been limited to only 10 banks, the BC246T groups channels into systems, allowing for 50 or more systems to be programmed and scanned simultaneously. Systems can still be quickly enabled or disabled using the 0-9 keys, and each system can have up to 10 groups of channels that are also available for quick selection. Uniden’s exclusive Close CallTM RF Capture Technology zeroes in on nearby transmissions without the need for programming, even when the BC246T is in other modes, scanning, searching or holding on a frequency. For example, if someone transmits within a few hundred feet (range depends on transmit power and other radio traffic in the area), the scanner immediately detects and tunes to the transmission, ideal for use at events when the frequency being used is unknown.

"Customers have been asking for smaller scanners, more flexible programming and more features, and this is what we set out to deliver," said Paul Opitz, Uniden product manager."Continuing Uniden’s leadership in scanners, the BC246T brings scanning technology to a new level."

The BC246T comes complete with two NiMH AA batteries, internal recharging, PC programming and control. Key features include:

- Compact Size (4½" x 2¾" x 1¼")
- TrunkTracker III Technology (Motorola, EDACS, and LTR Analog Trunking)
- Comprehensive Analog Trunking including I-calls, Emergency Alert, Trunk Search and ID Blockout
- Up to 3300 Channels, Dynamically Allocated
- System, Channel Group and Channel Alpha Tagging
- 25-54, 108-174, 216-225, 400-512, 806-956, 1240-1300 MHz Coverage
- Close CallTM RF Capture Technology
- SAME Weather Alert
- 10 Programmable Search Ranges
- 12 Preprogrammed Service Searches
- Backlit Display
- CTCSS/DCS Rapid Decode

140. [Freq Of Nature] American Heroes Air Show

Yahoo group: freqofnature
Date: 2004-06-13 22:57:02 UTC
From: Tracy
Topic: 140 Message: 140

[http://www.heroes-airshow.com]

[Source: American Heroes Air Show (http://www.heroes-airshow.com)]

USAF Combat SAR SQD Selected for Event Trading Card

Event officials today released a copy of the event trading card for the 2004 American Heroes Air Show which presents the Sikorsky HH-60G aircraft flown by the USAF 66th Rescue Squadron based at Nellis Air Force Base near Las Vegas. This unique aircraft and flight crew attended and was a favorite among the participants at last years Heroes event.

Since 1993 the Heroes event has profiled a different air squad on collectible event trading cards to promote the dynamic role of helicopters in law enforcement, fire service, Search & Rescue as well as homeland security and national defense.

Previous cards in the American Heroes series have included the Boeing AH-64 Apache, the Sikosky Firehawk flown by LA County Fire Dept as well as the LA City FD Bell 412 among others. This year will be the first time that a unit and aircraft from the U.S. Air Force will be profiled. The 66th RQS' primary role is the harsh world of behind-the-lines combat search and rescue where their heavily modified and aggressively armed Sikorsky PAVEHAWK helicopter excels.

The card features technical and performance attributes of the Sikorsky PAVEHAWK helicopter and relates the details behind one of the unit's recent missions. Special thanks to Captain Mathew Wenthe and 1st Lt. Jim Hughes for their help with the technical specs on the PAVEHAWK.

The 66th RQS Squadron is expected to attend the Heroes Air Show and be available to autograph cards and talk further with the community about their mission and support the US Air Force Recruiting team that will be on hand.

The event trading cards are free and the limited supply will be available only to the early arrival guests.

More Than Just One Event!

In addition to presenting the nation's premier admission-free helicopter air show, the American Heroes event also offers the annual CODE 3 Career Fair presentation with recruiting teams from law enforcement, public safety and the military with info on hiring, training and application processes.

The FIRST PROMISE Program offers information and resources about emergency preparedness for families and businesses in the community plus family tips for Internet safety from the FBI's Citizens' Academy Family Safety Squad.

The event also offers the annual Rollin' to the Rescue presentation of vintage and restored police, fire and emergency vehicles as they roll Code 3 into the event during the morning for static display throughout the day.

The day will also feature special awards, flight demonstrations, mission briefings, concessions and vendors with aviation and emergency preparedness products and resources.

Event Details for The American Heroes Air Show

Saturday, July 17th 9 a.m. to 4 p.m.
Hansen Dam Recreation & Sports Complex
11708 Foothill Blvd
Lake View Terrace, California
San Fernando Valley near Los Angeles
Exit the Foothill (210) Freeway at Osborne
FREE Admission and parking

This event is hosted by the City of Los Angeles Council members Alex Padilla and Wendy Greuel, the Los Angeles Department of Recreation and Parks plus our Corporate Partners: Rydell Automotive Group and Kawasaki.

Paul G. Allen and Burt Rutan Announce Plans for First
Non-Government, Privately Funded Manned Space Flight

A privately-developed rocket plane will launch into history on June 21 on a mission to become the world’s first commercial manned space vehicle. Investor and philanthropist Paul G. Allen and aviation legend Burt Rutan have teamed to create the program, which will attempt the first non-governmental flight to leave the earth’s atmosphere.

SpaceShipOne will rocket to 100 kilometers (62 miles) into sub-orbital space above the Mojave Civilian Aerospace Test Center, a commercial airport in the California desert. If successful, it will demonstrate that the space frontier is finally open to private enterprise. This event could be the breakthrough that will enable space access for future generations.
The aircraft is scheduled to roll out of the hanger at 6:30 AM for an early morning launch when winds are at their calmest. CNN will be covering the event with a live broadcast. Ridgecrest FM radio station, KLOA FM 104.9, will cover the event live, including updates and even the flight's radio calls.

Freq Of Nature is proud to announce the return of the popular FCC Grants and Updates database; Now with even more features and details including direct linking to FCC online database records and Topomaps.

Special thanks to the kind folks at ScannerBuff Network for hosting this database.

The FCC Grants and Updates database is currently only available to FON VIP donators for beta testing. We hope to eventually release this project to all FON visitors after the next exciting project is ready for beta testing by our VIP donators.

You can have access to this project now, along with several detailed radio frequency guides and documents, by simply clicking the ‘Make a Donation’ button and sending us some programming fuel (Soda and Coffee).

[http://www.freqofnature.com/photos/heroes2004/index.html]

?
Photo of the American Heroes Air Show 2004 have been posted to the Freq Of Nature web site.
?
Tracy and Karen of Freq Of Nature arrived at the air show around 9 am, too late to watch the arriving helicopters. The morning was hot with little wind but that changed toward the afternoon when the wind kicked up a bit. We immediately picked out a nice spot under the shade of a large tree to set up our command post, which consisted of a couple of chairs and plenty of bottled water.
?
Through out the day we met up with several members of SoCalScan and the Southern California Monitoring Association. The FRS Channel 1 was our “calling” channel and it worked out well even with the amount of traffic on the channel. We also struck up conversations with other fellow radio monitors and handed out prepared cards with the air show frequencies and the Freq Of Nature web site address.
?
As we made our way from booth to booth and helicopter to helicopter Tracy enjoyed chatting with some of the folks that worked the Ronald Reagan funeral detail. Tracy had worked that week as a member of the Simi Valley CERT/DSW platoon performing tasks like traffic control and perimeter security. It was an especially nice surprise to see our home town police department, Simi Valley, in attendance as well as the Ventura County Sheriffs.
?
Fire helicopters were parked on the edges of the park in case they needed to respond to an emergency. Many scheduled fire helicopters and displays were already canceled because they were working brush fires. Murphy must have caught wind of the event too because midway through the show a major brush fire started near by in the Santa Clarita Valley. Through out the rest of the event both helicopters and ground units had to prematurely depart to fight the fire.
?
The Los Angeles Police Department came to the rescue of the air show by performing a couple of fly-bys by two air ships. The LAPD also had a helicopter on static display making a total of three helicopters in attendance. Even with all of the canceled fire helicopters we counted no less than 22 helicopters and many more ground based emergency apparatus.
?
At the end of the day as the rotor Heroes departed the event they thrilled the crowd with grand finales by flying their air ships low and fast over the field. Karen was particularly impressed by the performance of the US Customs Blackhawk helicopter (OMAHA 23) fly-bys.
?
Even with the SNAFUs of nature the air show was a great event; as great if not better than last year’s event. We are already looking forward to next years American Heroes Air Show.

150. [Freq Of Nature] Moorpark's fire station, helipad get closer look

Yahoo group: freqofnature
Date: 2004-07-30 07:40:39 UTC
From: Tracy
Topic: 150 Message: 150

[http://www.venturacountystar.com]

[Source: Ventura County Star (http://www.venturacountystar.com)]

By Jake Finch, Ventura County Star Correspondent

A proposed fire station and helipad in a housing project being considered for northeast Moorpark would improve coverage in the remote area that was ravaged by wildfires last fall, fire officials said at a public hearing Wednesday night.

Despite the potential benefit, the North Park Village & Nature Preserve still faced intense scrutiny by residents.

Ventura County Fire Department Deputy Chief Dave Festerling said the proposed two-acre fire station site would be welcomed by the department but that a search is already on for a future station to cover east Moorpark and west Simi Valley.

"Right now, our protection there is adequate but marginal," he said. The closest station is near Walnut Canyon Road and Los Angeles Avenue.

Festerling called the proposed helipad in the project's north end a great addition but said that during a fire pilots would avoid taking water from North Park's 52-acre lake because of surrounding homes.

Photos from Operation Determined Promise have been posted to the Freq Of Nature web site.

Operation Determined Promise is a multi-level major exercise to test the ability to respond to multiple, simultaneous homeland defense and federal relief events. This years scenario is designed around events in California and Virginia. This photo essay focuses on one of the events in Simi Valley, California.

The scenario for this exercise was a train that derailed into a Boy Scout Camp. Some of the rail cars contained hazardous materials. To make matters worse another rail car was transporting military weapons including grenades, mortars and stinger missiles; two of which were missing. It was later discovered that one of the rail cars had a bomb on board which was linked to yesterday’s (August 5th) container explosion in the San Pedro event.

Saturday, September 18th, 2004
10:00 am - 2:00 pm
6115 Variel Avenue, Woodlands Hills, CA 91367

Code 3 Collectibles is paying tribute to local fire-rescue and law enforcement agencies by holding a community event called "Salute Our Local Heroes." This community event will include demonstrations, apparatus displays, helicopter fly-bys, public information/vendor booths, food, & free giveaways. Here is your chance to meet and greet local fire-rescue and law enforcement personnel and say "Thank You" to all the men and women who risk their lives everyday so that we can live in safety.

Participating agencies include:

Burbank Fire Deptartment
Los Angeles County Fire Department
Los Angeles Fire Department
Ventura County Fire Department
California Highway Patrol
Los Angeles Police Department
Los Angeles Sheriff's Department
L.A. Unified School Police

For more information please see the Code 3 Collectibles web site at

156. [Freq Of Nature] Simi Valley Emergency Response Class

Yahoo group: freqofnature
Date: 2004-09-04 07:42:07 UTC
From: Tracy
Topic: 156 Message: 156

[http://www.venturacountystar.com/vcs/sv/article/0,1375,VCS_239_3150407,00.html]

[Source: Ventura County Star (http://www.venturacountystar.com)]

Fall classes for the city of Simi Valley's Community Emergency Response Team training will begin Sept. 7.

The training consists of 10 class meetings. Nine are conducted in the emergency operations center at the Police Department at 3901 Alamo St., and one is held as an all-day emergency exercise at the Ventura County Fire Department training academy at 102 Durley Ave. in Camarillo.

The classes are open to people 18 and over who live or work in Simi Valley. Those selected to participate will be exposed to disaster preparedness, fire safety, disaster medical operations, light search and rescue, disaster psychology, CERT organization, terrorism and team leadership.

Classes will be conducted Sept. 7, 14, 21 and 28; Oct. 5, 12, 19 and 26; and Nov. 4 and 6. With the exception of the Nov. 6 exercise, all classes are conducted at the Emergency Operations Center at the Police Department from 7 to 10 p.m. on the dates indicated. Interested citizens can apply by calling class coordinator Bruce Wilson at 583-6238.

160. [Freq Of Nature] Helicopter Awareness Day

Yahoo group: freqofnature
Date: 2004-10-08 15:36:37 UTC
From: Tracy
Topic: 160 Message: 160

[http://www.phpa.org]

Last years Helicopter Awareness Day was muted by disastrous fires in Southern California. This year’s event is your chance to personally thank these helicopter pilots that were instrumental in saving our homes, lives and property.

Looking for a Weekend Mission with the Right Stuff?

Then make plans now to buckle up for action and land your family at the upcoming Helicopter Awareness Day at Los Alamitos Army Air Field where you can introduce your family to the local Heroes of Airborne Public Service.

Be on scene when the Professional Helicopter Pilots Association (PHPA) in conjunction with the Los Alamitos Chamber of Commerce hosts many of the top airborne teams from law enforcement, fire safety and the military at the annual Helicopter Awareness Day (HAD).

For over ten years the PHPA’s HAD event has offered the public a rare opportunity to explore one of the West Coast's largest display of helicopters from law enforcement, fire safety, emergency response, military and the news / media.

The event is also a special opportunity to see helicopters and meet with air / rescue crews often in the media while learning more about the equipment and tactics used in their vital roles of Search & Rescue, homeland security and national defense.

In addition to a special visit from the U.S. Coast Guard - Air Station Los Angeles with their HH-65 'Dolphin' rescue helicopter seen often in the news, the Department of Homeland Security will present their HH-60 Blackhawk used for pursuit, interdiction and surveillance to maintain border security.

As a special treat, PHPA invites families to get a bird's eye view of the action and climb aboard special helicopter rides that will be offered all day.

161. LAPD and NYPD Radio Traffic recordings.

Yahoo group: freqofnature
Date: 2004-11-06 21:59:48 UTC
From: Dave
Topic: 161 Message: 161

Hi gang.

Greetings from the UK England.

Can any one help me I wonder ??

Im looking for some one who can provide me with CD's of radio traffic from the LAPD and NYPD.

Or failing that some one who would email me sound files ???

Im trying to get audio recordings as I have a LAPD uniform that i wear to shows ect and it would be good if i can actually have real radio traffic coming out of my radio. I will be doing teh same for NYPD when i get my uniform sorted out.

Ive treid to record traffic from the net but its never works very well.

If any one can help it would be very much appriciated.

I love the FON website.

Take care

Dave.

166. [Freq Of Nature] Rebanding on 800 MHz and 406 MHz

Yahoo group: freqofnature
Date: 2005-03-04 17:09:56 UTC
From: Tracy
Topic: 166 Message: 166

[http://www.apco911.org/frequency/QA.htm]

Beginning this year, most trunked systems both civilian and federal/military will be rebanded. Everyone will need to keep up-to-date on the frequency changes.

Land Mobile Radio systems on many military bases around the country currently are or will be transitioning to frequencies in the 380-399.9 MHz band http://www.macom-wireless.com/federal/p25.asp By mandate, many Federal LMR users have only until 1 January 2005 to transition existing VHF systems from 25 kHz wideband channels to 12.5 kHz narrowband channels. UHF wideband users (406.1 - 420 MHz) have until January 2008 to make the transition. DoD users in the 380-399.9MHz band are migrating to narrowband in compliance with DoD LMR Policy, dated 1 August 2001.

MESA, ARIZ. --- Williams Gateway Airport Authority will host an Airport Open House Saturday, March 12 from 9:00 a.m. to 2:00 p.m. at the Airport’s passenger terminal.

The FREE event is open to the public and will include Airport-based aircraft on display, children’s activities, Radio Disney AM 1580 on site, Airport tours, Silver State Helicopters will be selling rides for $25 per person, and many other exciting prizes and giveaways, including free airfare and hotel accommodations at Harrah’s Laughlin Casino.

"We’ve had a busy year, being named 2004 ‘Arizona Airport of the Year’ and setting records for jobs created and airport operations," said WGAA Executive Director, Lynn Kusy. "This is a great event to showcase all of last year’s progress. We had over 2,500 people visit during the Open House last year and we expect even more to come out this year. And as always, parking is free too!"

Williams Gateway Airport is owned and operated by the Williams Gateway Airport Authority that includes the Gila River Indian Community, Gilbert, Mesa and Queen Creek. For more information, visit www.flywga.org (http://www.flywga.org).

170. [Freq Of Nature] LAPD Dispatch Center Open Houses

Yahoo group: freqofnature
Date: 2005-03-24 06:51:51 UTC
From: Tracy
Topic: 170 Message: 170

[http://www.lapdonline.org/press_releases/2005/03/nr05176.htm]

"LAPD Celebrates National Dispatchers' Week, Hosts Dispatch Center Open Houses"

The Los Angeles Police Department Communications Division will celebrate National Dispatchers' Week April 10th thru 16th. The annual event, established in 1992 by President George H. Bush, honors police dispatchers nationwide for providing vital emergency services in their respective communities.

LAPD dispatchers, known as Police Service Representatives (PSRs), are an integral part of the public safety net in Los Angeles. They fulfill dual roles as police dispatchers and 911 Operators. In 2004, PSRs provided all dispatching services for LAPD officers and answered 3.3 million calls for police service from the public.

As part of the weeks' activities, Communications will award the 2005 Most Valuable PSR Awards. One PSR and one supervisor from each shift will be selected by their co-workers as epitomizing the ideals of teamwork, service to the community and leadership for which the division is known.

In addition, the LAPD's two state-of-the-art dispatch centers will offer guided open-house tours for officers, city employees, members of the media and the general public. Specific times of the tours are: 12:30 a.m., 8:00 a.m., 10:00 a.m., 5:00 p.m., and 8:00 p.m. Refreshments will be provided. Due to space limitations reservations are strongly suggested.

Monday, April 11, 2005
Valley Communications Dispatch Center (VCDC)
23001 Roscoe Boulevard
West Hills, CA 91304

Tuesday, April 12, 2005
Metropolitan Communications Dispatch Center (MCDC)
100 North Los Angeles Street
Los Angeles, CA 90012

Tour reservation requests and/or questions may be directed to PSR Marco Mendoza in the Community Relations Unit at 213-978-6511 or 213-978-6510.

174. [Freq Of Nature] LAPD "Mission Area" to open May 1

Yahoo group: freqofnature
Date: 2005-04-23 20:51:23 UTC
From: Tracy
Topic: 174 Message: 174

[http://harrymarnell.com/lapd-freqs.htm]

Barring any last-minute disasters, LAPD Mission Area will be opening for business next Sunday morning, May 1, with the first patrol roll-call at 06:15 and the "19-Adam-xx" (sounds weird) cars hitting the street at 07:00.

Dispatch/Base frequency, Channel 19, will be 484.8875R (P25 digital, repeater)

Enhanced/Fallback (aka "Simplex") Ch 119, will be 484.825 (P25, simplex or repeater).

The station is at 11125 N Sepulveda, and the division will take over roughly the eastern third of Devonshire Div and the western third of Foothill.

They talk about "improved response times" coming as a result of a new station, but I don't know how that will happen unless they bring more officers to the valley from elsewhere and create additional "basic car"
beats and/or add more X-cars. Merely shuffling people out of one station into another won't put more officers on the streets, IMHO.

I'm trying to get car plan and a map of the division, and I'll post it when I do, at http://harrymarnell.com/lapd-maps.htm

Harry

175. [Freq Of Nature] Southwest Frequency Directories 9th Edition

Yahoo group: freqofnature
Date: 2005-04-28 02:25:07 UTC
From: Tracy
Topic: 175 Message: 175

[http://www.freqofnature.com/index.php?m=Store&pg=/store/scannerguides.html&t=Scanner%20Directories]

(http://www.freqofnature.com/index.php?m=Store&pg=/store/scannerguides.html&t=Scanner%20Directories)ScannerStuff has done it again. New for 2005-2006 the Southwest Frequency Directory 9th edition is available for sale. The SWFD-9 is the newest and most up to date scanner information resource for Arizona. The 256-page 8.5" by 11" directory is nearly a third larger than the 8th edition. The book is set-up by county (including all 15 Arizona counties) for easy use and is packed full of information written and edited by local scanner experts!

As if that were not enough, a smaller frequency directory that covers just the metropolitain areas, the Phoenix/Tucson Metro guide is new for this year. A compact excerpt from the larger Southwest Frequency Directory. This 192-page 4.25" by 7" book will enhance radio monitoring by providing the most important aspects of its larger counterpart, in a smaller package designed for eastern Maricopa and Pima counties. Keep one as a quick reference in the car!

If you can't decide on which one is best for you we've helped you make up your mind by offering a discount package which includes BOTH books! The perfect combination! Receive one SWFD9 256-page 8.5" by 11" complete "big book" with detailed statewide coverage, plus one compact 192-page 4.25" by 7" 9th edition Metro Guide. Keep one as a quick reference in the car!

Don't forget the premier Southern California scanner resource, the Southern California Frequency Directory. SCFD is the largest and most complete directory for Southern California. The all-in-one 448-page directory is organized by county (including 10 Southern California counties) for easy use and is packed full of information written and edited by local scanner experts!

You can purchase these frequency directories at Freq Of Nature and help support one of the best free online radio scanning resources on the Internet. Click the Store icon or the picture of the frequency directory on the left side of your screen.

[http://www.heroes-airshow.com]

American Heroes Air Show Set to Land at Hansen Dam

Buckle up for high-flying excitement when the nation's premier aviation event devoted exclusively to helicopters lands at the Hansen Dam Recreation & Sports Complex in the Lake View Terrace area of the San Fernando Valley.

Since 1993, this admission-free event has been dedicated to the unique capabilities and dynamic role of helicopters in law enforcement, fire service, public safety and the military. With aircraft from local, regional, state and Federal / DOD agencies, guests are treated to an up close look at why these aircraft and their crews are on the front line of homeland security, national defense and public service.

Explore the evolution of helicopters from elegant lines of the U.S. Coast Guard HH-65 Dolphin to the life-saving, Hi-Tech muscle of the S-70 "Firehawk" helicopter from LA CO Fire Dept / Air Squad. It's a unique opportunity to learn why these aircraft are the first tool out of the toolbox in times of natural disaster or homeland security threats and their crews are the Heroes your family can really look up to !

Plus, have your camera ready and introduce your entire crew to many of the Southland's most well known celebrity / media pilots and news reporters plus get an up-close look at the aircraft you see them in every day for traffic and news reports.

More than just an Air Show, the American Heroes event also features the Code 3 Career Fair which brings together recruiting teams from the military, police, fire, government service, volunteer agencies and all military services to profile what they do and how you can be a part of the action.

These recruiting teams from many of today’s "Top Gun" agencies offer information and personal insights on:

- Mission of their organization in today’s dynamic world of security and safety
- Hiring criteria and entrance testing schedules.
- Unique gear and equipment available.
- Salary and compensation ranges.
- Discover the personal attributes needed for success in today’s law enforcement, military and public service organizations.

The Heroes event also offers the annual favorite, the "Rollin’ to the Rescue" presentation of vintage police, fire and emergency vehicles as they roll into the event and set up for static display throughout the day. Over sixty emergency service vehicles plus members of LEMA - Law Enforcement Motorcycle Association will roll Code 3 into the event site - scheduled to arrive at 10 am.

The SAR SITE1 program introduces the community to many of the finest Search & Rescue teams from mountain, urban, swiftwater, canine and Combat / SAR organizations. Check out

technical rope rescue demos and learn how you can join the action as a reserve volunteer - part of a local Search & Rescue team. Explore canine SAR capabilities with demonstrations and teaching resources.

The FIRST PROMISE presentation offers guests with information and resources on emergency preparedness tactics for businesses and community plus family tips for Internet safety from the FBI and the National Center for Missing & Exploited Children.

The traditional collectible event trading cards are back and available free in limited quantities to early bird arrivals. The cards this year feature the Sikorsky HH-60G Pavehawk used extensively for combat SAR by the U.S. Air Force’s 66th RQS Squadron based at Nellis AFB near Las Vegas. Plus Award presentations on stage, entertainment, concessions and much more.

178. [Freq Of Nature] ICIS Update

Yahoo group: freqofnature
Date: 2005-07-16 05:24:34 UTC
From: Tracy
Topic: 178 Message: 178

[http://www.freqofnature.com/index.php?m=Los%20Angeles%20County&p=Glendale]

[Source: Steve Hronek; from the SoCalScan Yahoo Group]

Culver City has joined the ICIS JPA, and has been awarded a federal grant to upgrade their existing system to SmartZone and connect it to the ICIS network.

Current ICIS "member" (owner) cities with projects underway or completed are:
Beverly Hills
Burbank
Culver City
Glendale
Montebello
Pomona

There are also "subscriber" agencies using the cells, but which are not full members/cell owners; and ICIS will soon be beginning construction of out-of-the-area cells to permit member and subscriber agencies to remain in contact with their home agencies when operating out of the Los Angeles metropolitan area.

National Geographic reporter Joel K. Bourne, Jr. predicted Katrina and the lack of planning by local officials nearly a year in advance of the storm. Read Joel’s article at the following URL.

http://205.188.130.53/ngm/0410/feature5/?fs=www3.nationalgeographic.com

National Public Radio's Morning Edition program on September 23, 2005 featured conference calls recorded by Emergency Manager Walter Maestri of Jefferson Parish during the Katrina incident. It should be noted that these are censored recordings of the conference calls which Mr. Maestri and NPR selected to release.

Very cool! Even at 4:30 a.m. when getting up for a glass of water.
I'll play some more and let you know. I like your using the Google
maps, and that they open in a new window. Or is that part just my
setting?

Oh, a "top of my head" obs is that you might want to put the labels
(State, City, Freq) above or before their blanks, rather than after.

Harry

[http://www.incidentbroadcast.com]

Incident Broadcast Network (IBN) is a website that hosts a popular TeamSpeak Server, providing free live scanner audio feeds from around the US and Canada. In addition to the TeamSpeak service they have a tutorial on how to use TeamSpeam, online message boards, an incident paging service, and online recorded audio from police and fire incidents.

Live scanner broadcasts currently operating on IBN include:

NY - FDNY NYPD & Hudson NJ
CO - Denver Police
IL - Chicago
IL - Dekalb County Sheriff
IL - Springfield/Sangamon Co.
IN - St. Joseph County
KS - Salina/Saline County
MN - Willmar
NJ - Ocean County/NJSP
NJ - South Jersey
NY - Orange County
ON - Toronto/Durham
PA - Allegheny County
PA - Allentown/Lehigh County
PA - Armstrong County
PA - Harrisburg
PA - Montgomery County Fire
PA - Pittsburgh Fire
PA - Pittsburgh Police
PA - York
VA - Amherst County
VA - Lynchburg
VA - Richmond Area Fire/EMS
VA - Richmond Area Police
PA - Westmoreland County DPS

Check out IBN for yourself ... www.incidentbroadcast.com

From: Tracy
Topic: 186 Message: 186

[http://www.aopa.org]

[Source: AOPA (http://www.aopa.org)]

AOPA February 3, 2006 - No doubt about it, they're serious about security around this Sunday's Super Bowl in Detroit. Some 10,000 security officers will be carefully watching 67,000 spectators at the game. Radiation and explosives detectors will be deployed at all of the approaches to Ford Field.

And the super security includes the air. Both the United States and Canada have issued presidential-sized TFRs encircling the stadium out to 30 nautical miles and up to 18,000 feet. Inside that is a 10-nm no-fly zone that will be patrolled by Air Force fighters.

"We're the last line of defense," Lt. Col. Bill Hargrove told ABC News Wednesday. When Correspondent Pierre Thomas asked if he was prepared to take the order to shoot down a non-responsive civilian aircraft entering the inner ring, he answered, "Absolutely!"

AOPA urges pilots to exercise extreme caution. More on Super Bowl TFR... (http://www.aopa.org/whatsnew/newsitems/2006/060203superbowl.html)

187. [Freq Of Nature] APCO encourages plain speech

Yahoo group: freqofnature
Date: 2006-02-15 02:36:28 UTC
From: Tracy
Topic: 187 Message: 187

[http://www.apcointl.org/government/positions/PlainSpeechPosition021306.pdf]

Source: Plain Speech in Public Safety Communications
APCO International (http://www.apcointl.org), February 2006

Plain speech for public safety communications operations has been a matter of considerable discussion within the first responder community for several years. With the requirement to implement the National Incident Management System (NIMS), an effort by the Department of Homeland Security (DHS) to better coordinate emergency response between different jurisdictions and disciplines, APCO International has considered this issue in the context of sharing information by first responders.

APCO International encourages the use of sensible plain speech alternatives for common 10-Codes. For example:

10-4 – copy or acknowledge or understood
10-20 – my location is
10-28 – registration check – reg. check

APCO International believes that officer safety will be enhanced through thoughtful development of plain speech alternatives to codes/signals that protect the sensitivity of confidential information.

APCO International strongly supports the autonomy of local, county, state and other law enforcement agencies to make operational decisions. However, NIMS compliance is important and this fundamental communication procedure will have a dramatic affect on interoperability across the nation. APCO International supports the goal of NIMS of good faith efforts at all levels nationwide to move to plain speech for all emergency operations.

189. freq and beats

Yahoo group: freqofnature
Date: 2006-03-04 16:04:20 UTC
From: John
Topic: 189 Message: 189

Hey Tracy

Been hearing traffic from Ventura PD with "5x" unit designations. Have they added a new patrol area, or are these one of the storefront designations?

I've also noticed that Oxnard has changed their dispatch freq to 155.745. And shifted 155.655 to channel 3. What then, are they using for channel 2 these days? Did they move up the tactical (154.785), or the talk-around(156.090)?

By the way, VPD's talk-around is 156.120 (not 155.310) using it for years. They somtimes use it for talking to dispatch for traffic/clearance (espescially if they think you have a scanner). Had one of 'em trying to be slick a few years back when they thought that freq was a big secret knowing I had scanners in my car. Then they heard themselves on my radio. I told them that I found it by accident. It used to be listed as a public works freq. Still is, I think.

Not exactly what you're asking, but there are some changes shown on RadioReference, from December, for several PDs/FDs, including a bunch of shuffling of fire freqs set to be completed in April. The latter are at http://www.radioreference.com/modules.php?name=RR&aid=625

and check out the others from http://www.radioreference.com/modules.php?name=RR&ctid=238

They don't all quite match up, but it's tough for anyone to keep everything straight these days with all the reprogram-on-the-fly radios out there.

Harry

From: Tracy
Topic: 194 Message: 194

[http://www.azcentral.com/news/articles/0329towers0329-ON.html]

[Source: The Arizona Republic]

PHOENIX March 29, 2006 by Brent Whiting - Vandals took a torch and toppled four 197-foot radio towers that are part of a seven-tower cluster in Black Canyon City, authorities said Wednesday.

The damage has been preliminary estimated at "millions of dollars," said Susan Quayle, a spokeswoman for the Yavapai County Sheriff's Office.

Knocked off the air was KMIA-AM (710), a Spanish station in Phoenix. It broadcasts ESPN Deportes, a sports-talk format that was launched last month.

From: Tracy
Topic: 196 Message: 196

[http://www.venturacountystar.com]

[Source: Ventura County Star (http://www.venturacountystar.com)]

Thunderbirds, Blue Angels not available

By John Mitchell April 12, 2006

In the past five years, the Point Mugu Air Show has been plagued by bad weather, tragedy and the absence of a headliner.

This year is no different.

Because of scheduling problems, neither the Navy's Blue Angels nor the Air Force's Thunderbirds jet teams will be available for the fall air show, so it has been canceled.

"The show was scheduled for Oct. 7-8," said Teri Reid, Naval Base Ventura County's public affairs officer. "But we were flexible. We offered alternate dates in early September and the first week in November, but they didn't help."

This is the second year in the past six years that the air show has been canceled well in advance because there was no headliner. The other year was 2003.

In 2004, neither of the military jet teams was available, so organizers brought in the Patriots, the country's only civilian jet team. Reid said that team was not considered for this year's show.

Topic: 197 Message: 197

[http://www.spacearchive.info/minuteman-iii-gt-190gb.htm]

[Source: Brian Webb, SpaceArchive.info (http://www.spacearchive.info)]

In the early morning mist along the central California coast a strange light broke the bonds of Earth and rocketed skyward into the dawn. The strange light was a Minuteman III missile, launched from Vandenburg Air Force Base enroute to it's target location near at a test site near Guam.

These photos are courtsey of Briab Webb of the popular space & science website www.spacearchive.info. Please visit his website for more photos and details including dates of future rocket launches.

More photos and information... (http://www.spacearchive.info/minuteman-iii-gt-190gb.htm)

198. [Freq Of Nature] U.S. Navy “Firehawks” Land for Their Final Public Appearance at the American Heroes Air Show

Yahoo group: freqofnature
Date: 2006-05-20 05:34:48 UTC
From: Tracy
Topic: 198 Message: 198

[http://www.heroes-airshow.com]

Soon facing their U.S. Navy directed de-establishment, the Helicopter Combat Support Special Squadron (HCS) 5 is scheduled to participate in their last public appearance at the upcoming American Heroes Air Show in the San Fernando Valley.

As one of the preeminent Combat Search & Rescue units in the world, the HCS-5 Firehawks are a unique team - flying the highest-tech helicopters and employing front line tactics and resources, the unit is comprised largely of Naval reservists based at North Island Naval Air Station near San Diego. As the very first naval air squadron deployed to Iraq, HCS-5 earned the Navy Unit Commendation for exceptionally meritorious service while serving in Operation Iraqi Freedom where they completed more that 1,700 combat flight hours and 900 combat air missions. The award also commended the squadron for its rapid response to deploy to Iraq and their ability to commence combat operations within 10 days of receiving their deployment orders.

Because HCS-5 is largely comprised of Reservists the officers are not prone to re-assignment - they stay with Combat Search & Rescue because they love it and they get very, very good at it … the average HCS-5 pilot has 12.5 years of experience flying, more than 2,600 logged military flight hours and more than seven years of mission experience.

Combining two crucial military missions, HCS-5 squadron was established on 2 October 1988, when the combat SAR mission of HC-9 and the SPEC WAR support mission of U.S. Navy HAL-5 were combined. The Firehawks currently fly the Sikorsky HH-60H Seahawk and use its capabilities of speed and stealth to operate at ranges far from support ships or bases, in any climactic region. Working under the cover of darkness in hostile weather and threat environments, the Firehawks use this unique aircraft to perform critical missions necessary to fully support deployed U.S. forces. The Firehawks will have their HH-60 Seahawk on display at the American Heroes event fully armed with mounted weapons systems such as GAU17 and M240 machine guns.

To recognize the Firehawk’s long heritage of leadership in combat SAR Ops, event guests will find a special commemorative event trading card featuring the Firehawk’s SH-60H Seahawk helicopter plus a Tribute T-shirt will be offered for the very first time at the Heroes event. Supplies are limited for both items.

Families are invited to land at this admission free event and introduce their own team to one of the world’s finest Combat / Special Ops helicopters squadrons before they go out of business forever!

More Than One Event!

The American Heroes Air Show is the nation’s premier, helicopter-only, admission-free air show event designed to profile aviation’s dynamic role in law enforcement, public safety, communications, and search and rescue, as well as homeland security and national defense.

The event features static displays, flight demonstrations and information from flight crews at sites around the country. With aircraft from local, regional, state and Federal / DOD agencies, guests are treated to an up-close look at why these unique aircraft and talented crews are on the front line of public safety and community service.

The CODE 3 Career Fair offers guests information from recruiting teams on career opps in law enforcement, fire service, public safety and the military.

The “Rollin’ to the Rescue” Vehicle show presents vintage and restored police, fire and emergency vehicles as they arrive Code 3 into the event during the morning for static display throughout the day.

The “FIRST PROMISE Family Safety Fair” element of the event offers critical information and resources for families on how to prepare for, react to and recover from natural disasters and homeland security emergencies along with basic Internet safety tips for families.

Event Details

The American Heroes Air Show is a community resource jointly hosted by the city of Los Angeles, Los Angeles City Council members Alex Padilla (CD7) and Wendy Greuel (CD2).

Date: Saturday, June 24th

Location: The Hansen Dam Recreation & Sports Complex
11480 Foothill Blvd, Lake View Terrace, CA. 91342
Exit at Osborne from the Foothill (210) Freeway

Hours: 9 a.m. to 4 p.m.

FREE Event Admission

AMR Ventura County recently debuted their web site at www.amrventura.com (http://www.amrventura.com).

AMR (American Medical Response) is an ambulance company that servers much of Southern California including Ventura County. In fact AMR serves more communities and customers than any other private ambulance service in the nation. Chances are you have seen the familiar red on white ambulances with a logo of the United States sporting a caduceus and the letters 'AMR'.

In Ventura County AMR operates a fleet of twenty one ambulances serving most of the communities in the county.

200. [Freq Of Nature] Simi Valley's New Radio System

Yahoo group: freqofnature
Date: 2006-08-05 05:11:39 UTC
From: Tracy
Topic: 200 Message: 200

[http://www.simivalleyacorn.com]

[Source: Simi Valley Acorn (http://www.simivalleyacorn.com)]

The city of Simi Valley last week successfully completed the cutover to a new unified two-way radio system used by the city's operating departments in the course of providing general services to the community and essential public health and safety services.

...

The new system replaces aging systems that were no longer repairable, could not be modified to meet the FCC radio frequency licensing requirements, had radio signal coverage deficiencies and did not allow interdepartmental communications.

The new system provides stateof-the-art radio equipment, back up capability during system failures or power outages, and excellent radio signal coverage throughout the city and operational areas. It also allows for interoperability, including communications between the city departments and with other public safety agencies including other local, county, state and federal jurisdictions and agencies during emergencies and natural disasters.

The sound quality of the new system is far superior to the poor sound quality in the city's old radio systems.

City departments that reply on two-way radios for field communications include police, public works, community services and the Building and Safety Division of environmental services.

202. [Freq Of Nature] Glendale Honored for New Radio System

Yahoo group: freqofnature
Date: 2006-09-15 03:38:05 UTC
From: Tracy
Topic: 202 Message: 202

[http://www.glendalenewspress.com/articles/2006/09/14/publicsafety/gnp-icis14.txt]

[Source: Glendale News Press (http://www.glendalenewspress.com)]

By Robert S. Hong

GLENDALE? The California League of Cities presented a high honor to Glendale and neighboring cities for spearheading a system that makes communication between public-safety officials faster and easier.

Glendale was among six cities awarded the League's Helen Putnam Award of Excellence on Sept. 7 under the category of "Effective Advocacy, Intergovernmental Relations and Regional Cooperation" for its advocacy of the Interagency Communications Interoperability System.

Burbank and Pomona? which with Glendale are now operating the system? were also honored, along with Montebello, Beverly Hills and Pomona, which will join the network soon.

The award has given the system public exposure and allowed local residents to see improvements their cities have made for the communities' benefit, said Glendale Battalion Chief Don Wright, executive director of a joint-powers authority that oversees the system.

"It really put some meat to what we're doing." he said. "It brought some attention that we're doing a good thing with the taxpayers' dollars, we're cooperating to provide better service."

The system allows officials in a city to speak with one another within their own city radio channels, but since they are under a common network, they can also communicate with officials from other participating cities by switching to their respective channels.

This system may be especially helpful for police officers or firefighters who have traveled out of area to assist another city and need to communicate with that city's departments, Wright said.

With radio systems used previously, cities used separate radio systems that were not interlinked. This new system changes that by using discrete channels on a common system.

First considered in 1999, the system has quickly become and important part of city communications, Wright said. It was first put to service in Glendale in 2003, with the other cities following soon after.

The system was honored with the Helen Putnam award because of its unique nature and ability to assist government , said Steve Hronek, technical chairman for the system's joint-powers authority.

"If you have a project that is out of the ordinary? an example of exceptionally good governance? those are the kind of things [the award] recognizes," he said.

After the difficult process of getting system off the ground, the award was a great response to the fruits of the cities' labor, Hronek said.

"It was the validation of everything I have been dreaming for 15 years," he said. "To see it acknowledged? its tremendous."

204. [Freq Of Nature] Orange County Fire Authority Open House

Yahoo group: freqofnature
Date: 2006-10-12 03:37:57 UTC
From: Tracy
Topic: 204 Message: 204

[http://www.ocfa.org]

[Source: Orange County Fire Authority (http://www.ocfa.org)]

Meet Your Firefighters, Watch Live Fire Demonstrations and Learn Fire Safety at Orange County Fire Authority’s Open House on October 14

To celebrate National Fire Prevention Week, the Orange County Fire Authority will host an Open House on Saturday, October 14, 2006, from 9 a.m. to 2 p.m. at its Regional Fire Operations & Training Center, located at 1 Fire Authority Road (Jamboree & Tustin Ranch Rd.) in Irvine. Come out and see live fire demonstrations, enjoy free food from 11 a.m. – 1 p.m., and learn fire safety in a fun-filled environment.

There are plenty of activities and educational opportunities for families including bounce houses, fire engine rides, a fire-pumper crawl tube, performances by the Life and Fire Safety clowns, a fire sprinkler trailer, “watch what you heat” cooking safety trailer, EDITH (exit drills in the home) activity booth, tours of the dispatch center as well as numerous apparatus displays.

“This is one way to give back to the community,” said Fire Chief Chip Prather. “We are opening our Operations & Training Facility so that the residents of Orange County can see how their firefighters train.”

To see how firefighters prepare and stay abreast of current firefighting techniques, demonstrations on the training grounds will occur every half-hour beginning at 9:30 a.m. There will be a lot of visual photo opportunities of children interaction, live fire demonstrations and displays. Here is the schedule of demonstrations that will take place at the state-of-the-art training facility:

9:30 a.m. Ladder Evolutions
10:00 a.m. Academy Workout
10:30 a.m. Structure Fire Demonstration (2 engines)
11:00 a.m. Vehicle Extrication
11:30 a.m. Vehicle Fire
12:30 p.m. Thermal Imaging Camera (heat sensing device)
1:00 p.m. Structure Fire Demonstration (2 engines)
1:30 p.m. Vehicle Extrication

More information can be found at the Orange County Fire Authority web site at http://www.ocfa.org

[http://www.Heroes-airshow.com]

For the first time in the program’s history the Lone Star state will kick off the Heroes Air Show season by hosting the Texas event in Austin. The American Heroes Air Show, the nation's premier aviation event dedicated exclusively to helicopters, will land at the Texas Military Forces’ Camp Mabry on Saturday, April 21st. Event Director Brian Johnson, with the Austin – Travis County STAR Flight team, invites the public to this admission free program which is dedicated to educating the public, the media and elected officials as to the unique capabilities of helicopters in law enforcement, fire service, public / private EMS and electronic news gathering (ENG) as well as homeland defense and national security.

Florida will also host the American Heroes program for the first time in 2007. Officer Bryan Smith with the Gainesville PD – Alachua County Sheriff Joint Aviation unit will host an exciting display of helicopters from local, state, regional and DOD/Federal organizations. The Heroes Air Show is scheduled to land at the Veteran’s Memorial at Kanapaha Park in Gainesville on May 19th.

Always admission-free from Coast to Coast, the Heroes Air Show also features the CODE 3 Career Fair, which brings together recruiting teams from law enforcement, the military plus fire and public safety agencies with exciting career opportunities. The finest Search & Rescue teams from mountain, urban, swift water, canine and Combat/SAR organizations will also be available to answer any questions.

Exciting flight demonstrations, collectible event trading cards, concessions, aviation vendors, entertainment and special awards are all part of the American Heroes Air Show action for families!

2007 Schedule
The American Heroes Air Show features free admission and parking at all event sites:

Austin, TX. - Saturday, April 21st
Canton, GA. - Saturday April 28th
Gainesville, FL. – Saturday, May 19th
Seattle, WA. - Saturday, June 16th
Los Angeles, CA. - Saturday, June 23th

Land at the official event website: www.Heroes-airshow.com (http://www.Heroes-airshow.com)

From: Tracy
Topic: 210 Message: 210

[http://www.dm.af.mil]

[Source: John in Tucson]

The dates have been formally announced in the Davis-Monthan Air Force Base newspaper, Desert Airman, that the Annual Air Combat Command Heritage Conference will be held from Marth 1st to March 4th.

This is a very cool event and is the training background needed before these pilots flying in the Heritage Aircraft Formations must qualify in, at Davis-Monthan Air Force Base. These pilots fly to the various airshows around the United States and Canada and normally perform in a 3 or 4 ship formation for you.

There are 8 demonstration teams and they'll be flying the following aircraft during the conference:

Modern Fighters
A-10 Thunderbolt
F-4 Phantom
F-15 Eagle
F-15E Eagle
F-16 Falcon
F-22 Raptor

Vintage Fighters
F-86 Sabre
P-38 Lightning
P-47 Thunderbolt
P-51 Mustang

Look to the skies around Davis-Monthan AFB if you are in Tucson on these dates and don't be surprised to hear the sweet sounds of 3 Mustangs in formation buzzing overhead. Don't forget to have your camera with you, wherever you go. They do not just fly around the base. They'll fly up near the Catalina Mountains, providing an awesome backdrop, if you're lucky enough to catch it

In the past, they've used the following frequencies at airshows and around Davis-Monthan AFB:

118.5000 DMAFB Tower
127.1500
136.5750
136.6750
253.5000 DMAFB Tower
283.7000
305.4000 A-10 (Discrete)
376.0250 F-15 (Discrete)

384.5500 F-15/F-16 (Discrete)

If you aren't able to catch 'em here, they'll be heading your way in a future airshow near you.

[http://www.dmairshow.com]

These frequencies are from the 2005 Air Show and will be updated as needed.

127.1500 AIR BOSS
341.5000 AIR BOSS UHF
123.1500 AIR SHOW DISCRETE
123.4750 US ARMY GOLDEN KNIGHTS
143.9000 CIVIL AIR PATROL (PL 107.2)
148.1500 CIVIL AIR PATROL (PL 107.2)
138.1000 A-10 DEMO TEAM
122.4750 A-10 DEMO TEAM AIR/GROUND
118.8500 DAVIS-MONTHAN TOWER
253.5000 DAVIS-MONTHAN TOWER UHF
327.7000 DAVIS-MONTHAN SOF

The official web site for the air show is www.dmairshow.com

Mass F-16 launch to fill skies

Posted 12/10/2010
by Staff Sgt. Robert Biermann and Jodi Jordan
56th Fighter Wing Public Affairs

12/10/2010 - LUKE AIR FORCE BASE, Ariz. -- The skies around Luke Air Force Base will be busier than normal Wednesday during Cactus Starfighter, a large force exercise for the 310th Fighter Squadron and 310th Aircraft Maintenance Unit. During Cactus Starfighter, the combined efforts of Luke units will launch more than 30 F-16s at one time.

The exercise will focus on mission planning and coordination in addition to aerial maneuvers. All student pilots in the F-16 Basic Course must participate in similar exercises at the end of their training, but this Cactus Starfighter is unique in the number of aircraft launching simultaneously and the level of coordination required, said Capt. Christopher Hubbard, 310th FS instructor pilot.

The plan is for 36 F-16s to launch from Luke's runway. Of these, 32 will be "good guys" and four will be "bad guys," or aggressors, Captain Hubbard said.

Additionally, a KC-135 tanker aircraft from Altus Air Force Base, Okla., will launch from Luke and provide aerial refueling. Also joining in the exercise are F-15 aggressors from Nellis Air Force Base, Nev., and Marine Corps F-5 aggressors from Marine Corps Air Station Yuma. Providing command and control as well as intelligence gathering are three aircraft from other bases: a joint surveillance target attack radar system aircraft from Warner Robins Air Force Base, Ga.; an airborne warning and control system aircraft from Tinker Air Force Base, Okla.; and an RC-135 rivet joint aircraft from Offutt Air Force Base, Neb.

"It's always a goal to have as many aircraft flying as possible, because historically, in real conflicts, you would have this size of a package," Captain Hubbard said. A package is the combination of air assets a commander sends to battle.

"Unfortunately, we aren't usually able to put this many aircraft in the air," he said. "The size of the exercise force is determined by a host of factors, including maintenance schedules and air space limitations."

A large force exercise like Cactus Starfighter gives the B Course students realistic training in the way they would have to fight in a real-world

operation.

The impetus for Cactus Starfighter came when Lieutenant Col. Timothy Trimmell, 756th Aircraft Maintenance Squadron commander, issued a challenge to the maintainers of the AMUs here.

"In September, Colonel Trimmell challenged the AMUs to 'launch the fleet,' i.e., see which AMU could be the first to launch all their aircraft at once," said Capt. Joshua Downing, 310th AMU officer-in-charge. "We're meeting that challenge."

Regularly scheduled maintenance would normally preclude such a large launch of aircraft, Captain Downing said. In a normal week, at least three or four of the jets assigned to the 310th AMU aren't flying because of maintenance schedules. Also, the sheer numbers of maintaners needed to launch 20-plus aircraft required special consideration, he said.

The coordination process to perform has included the 308th and 310th FSs, 56th Operations Support Squadron air traffic controllers, 56th Maintenance Operations Squadron end-of-runway crews, 56th Fighter Wing plans and scheduling, and other AMUs.

Also helping to put the exercise together are the Airmen of the 56th Operations Group Intelligence Flight. The flight is responsible for providing intelligence briefings to the fliers on all aspects of the different threats and weapons systems they will be simulating combat against during Cactus Starfighter. "Basically, we come up with all the plans to ensure the pilots can defeat the threat, do their job and come back home safely," said 1st Lt. Chad Haring, 56th OG Intelligence Flight systems chief.

More aircraft means more pilots to brief.

"Instead of briefing two or four people across a table, we will be briefing a room full," he said. "Our mission is the same, but the volume and quantity changes. We have to be very precise in making sure each individual gets the information."

The event is going to include many assets, according to Captain Downing.

"This exercise will use all the resources we have," he said. "The nearly 260 Airmen assigned to the AMU will assist with the launch and recovery of the jets."

At least four jets will take off at a time, with a five to 10-minute gap until the next series takes off. Once all jets are in flight, they'll be airborne for nearly an hour and a half.

"The 'launch the fleet' large force exercise will be an epic celebration of TopHats history to have all TopHats airborne at once," said Lt. Col. Sean Routier, 310th FS director of operations. "Since it formally joined Luke Dec. 15, 1969, it's been training pilots and weapon systems officers."

213. L.A. County Sheriff Improvised/Disguised Weapons Guide (PDF)
